## **Acknowledgments**

DMDC is indebted to numerous people for their assistance with the eighth Web-based Status of Forces Survey (SOFS) for the Office of the Under Secretary of Defense for Personnel and Readiness (OUSD[P&R]). The SOFS are conducted under the leadership of Anita Lancaster, Assistant Director for Program Management, and Timothy Elig, Chief of the Survey and Program Evaluation Division.

DMDC's Survey Technology Branch, under the guidance of James Caplan, Branch Chief, is responsible for data collection and preparation for the SOFS Program. The lead analyst on this survey was Laverne Wright who was supported by Consortium Research Fellows Margaret Holland and Felicia DeHaney. Data Recognition Corporation (DRC) performed data collection and editing.

DMDC's Program Evaluation Branch, under the guidance of Eric Wetzel, Branch Chief, is responsible for the development of questionnaires used in the SOFS program. The lead developer on this survey was Kristin Williams. She was supported by Mike Ford, Consortium Research Fellow, in these efforts.

DMDC's Personnel Survey Branch, under the guidance of Richard Riemer, Branch Chief, is responsible for sampling and weighting methods used in the SOFS program. Richard Riemer standardized the sampling and weighting methods that allow repeated surveys of the active-duty force and he applied those methods to this survey. The sample design was optimized using DMDC's Sampling Tool. Susan Reinhold, Chief of DMDC's Programming Branch, and Carole Massey and Deborah West, from her staff, provided programming support for the sampling and weighting tasks.

# **MARCH 2005 STATUS OF FORCES SURVEY OF ACTIVE-DUTY MEMBERS: ADMINISTRATION, DATASETS, AND CODEBOOK**

## **Introduction**

The *Human Resource Strategic Assessment Program* (HRSAP), located at Defense Manpower Data Center (DMDC), consists of both Web-based and paper-and-pen surveys to support the personnel needs of the Under Secretary of Defense for Personnel and Readiness. These surveys assess the attitudes and opinions of the entire Department of Defense (DOD) community—active, reserve, civilian employees, and family members—on a wide range of personnel issues. The Web-based survey program, known as the Status of Forces Surveys (SOFS), provides timely data on active, reserve, and civilian members. There are nine SOFS Web surveys planned for each year, with three cross-sectional samples of each population: active-duty members, reserve component members, and DoD civilian employees. The paper-and-pen surveys are used to obtain data on sensitive topics (e.g., sexual harassment) and from populations with limited Internet access (e.g., spouses of active-duty and Reserve members).

## **Overview of Report**

The next section of this report describes the procedures used to develop the instrument, design the sample, conduct the survey, process the data and prepare analysis weights. Along with Appendices A and B, the methods section is the documentation of how the survey was conducted. DMDC (2005a) and Riemer and Kroeger (2002) provide details on sampling and weighting.

The third section of the report describes the survey analysis file layout and key variables. This section and the remaining appendices (C-K) address issues in the analysis of the survey data. Conventions for variable naming and construction are introduced in this section with details given in Appendices C (annotated questionnaire), D (explanation of coding), and I (explanation of key analytic variables). Explanations for the groupings of variables seen in the positional list of variables in Appendix F<sup>1</sup> are discussed in this section as well as a description of information available in Appendix G for each variable. Appendix G contains details for variables in the same order that the variables are listed in Appendix F. In addition to the variables available on the basic survey file, Appendix G contains details for the confidential variables that had to be suppressed to preserve the privacy of survey respondents and nonrespondents. Confidential variables are identified and listed in Appendices E and F. Key concepts required for the analysis of complex survey data and the structure of records in the survey analysis files are introduced in this section. Examples of analyses are given in Appendix J. The SAS code used to construct the analytic variables are included in Appendix I. Appendix H provides the record layout for the basic survey flat file. Appendix K summarizes questionnaire items used in recent DMDC surveys.

---

<sup>1</sup> An alphabetical list is at Appendix E.

## Method

### *Survey Instrument*

The topics covered in the March 2005 Status of Forces Survey of Active-Duty Members include a series of items that is included on all active-duty SOFS. These items include overall satisfaction, retention intention, perceived readiness, stress, Tempo, and permanent change of station (PCS) moves. In addition, items were included on deployments since September 11, 2001, deployments in the past 12 months, detailed Tempo and readiness, military and family life, financial health, programs and services, detailed stress, commitment, safety, and motorcycle usage. The survey was subdivided into the following 14 topic areas:

1. *Background Information*—Service, gender, paygrade, education, marital status, spouse employment status, race/ethnicity, dependents, and location (both geographic and on/off base).
2. *Satisfaction and Retention Intention*—Satisfaction with aspects of military life, overall satisfaction, likelihood to stay on active duty, and spouse/family support to stay on active duty.
3. *Tempo, Readiness, and Stress*—PCS moves, days worked overtime, time away from permanent duty station, the impact of time away on career intentions, individual and unit preparedness, and the level of stress in work and personal life.
4. *Deployments Since September 11, 2001*—Number of times deployed for operations, time spent away, location of deployments, days spent in a combat zone, combat involvement, deployment expectations, and stop-loss.
5. *Deployments in Past 12 Months*—R&R time and children born while deployed.
6. *Tempo/Readiness*—Reasons for working longer than usual, expectations of time away, coping with deployments, impact of deployments on children, and family care plans.
7. *Military Life*—Expectations of family and personal time and expectations of family and military life.
8. *Family Life*—Marital and personal problems within the unit, years married, number of times divorced, marital problems, and quality of relationship with spouse/significant other.
9. *Financial Health*—Financial problems and financial condition.

10. *Programs and Services*—Availability of and satisfaction with family support programs and services, reasons for not using Military OneSource, and number of times using Military OneSource via different modes, including Internet, email, and telephone.
11. *Stress*—Perceived stress, types of stressors and stress reducers, and preferred counseling for family and members.
12. *Commitment*—Commitment to serve.
13. *Safety* – Safety participation, support activities, and support climate.
14. *Motorcycles*—Owning and operating motorcycles and details on accidents and training courses.

## ***Sample***

The target population for all active-duty SOFS consists of (1) active-duty members of the Army, Navy, Marine Corps, and Air Force, (2) having at least 6 months service at the time the questionnaire is first fielded, (3) below flag rank when the sample is drawn six months prior to the survey, and (4) excluding National Guard and Reserve members in active-duty programs.

### ***Stratification Variables***

The sampling frame was constructed using the six stratification variables listed in Table 1. These six variables were used to create stratification cells. A single variable, SF02CELL, was created as an index variable for the strata.

**Table 1.**  
***Stratification Variables***

<b>Dimension of Stratification</b>	<b>Levels</b>
Service	Army Navy Marine Corps Air Force
Gender	Male Female
Paygrade Group	E1 to E3 E4 E5 to E6 E7 to E9 WO1 to WO5 O1 to O3 O4 to O6
Race/Ethnic Category	Minority Non-minority
Regions	US & US territories, Other, Unknown Europe Asia & Pacific Islands All Regions
Family Status/Dual Service Spouse	Unmarried with Child(ren) Dual Service Spouse Other Family Status

Researchers identified subgroup breakouts (i.e., domains) that would be important when survey results were provided to policy officials. These reporting domains were defined by DMDC (2005a) and Riemer and Kroeger (2002) using the 10 demographic variables shown in Table 2. For three demographic characteristics (race/ethnicity, region, and pay group), multiple versions of variables were created that differed in the level of detail. Less detailed variables were often used to define domains for analyses within the four Services than were used to define domains at the DoD level.

Next, researchers determined the number of people who would be sampled for each stratum using a sample-planning tool developed for Defense Manpower Data Center (Deever & Mason, 2002). A formal mathematical procedure (Chromy, 1987) based on Karush-Kuhn-Tucker theory is used in the sample-planning tool to determine an optimized sample size and allocation—a sample that would achieve at minimal cost (i.e., minimum sample size) the precision levels required for each analytic domain. The Kuhn-Tucker theory provides an optimal solution to satisfy precision constraints (e.g.,  $\pm 5$  percentage points) imposed on estimates of prevalence rates in key reporting domains. Researchers iteratively modified the inputs to the sample-planning tool to arrive at acceptable precision levels for reporting domains that would be of particular interest to policy officials. The domains match the reporting categories used in tabulating results (DMDC, 2005b).

**Table 2.**  
***Factors Defining Key Reporting Domains***

<b>Variable</b>	<b>Categories</b>
Service branch <sup>*</sup>	Army Navy Marine Corps Air Force
Paygrade Group 1 <sup>*</sup>	E1-E3 E4 E5-E6 E7-E9 W1-W5 O1-O3 O4-O6
Sex <sup>*</sup>	Male Female
Race/Ethnic Category 2 <sup>*</sup>	Non-minority (Non-Hispanic White) Minority
Family-status 1	Unmarried with children Without children or married with children
Duty Location	U.S. Asia/Pacific Islands Europe
Dual Service Spouse <sup>*</sup>	Not Dual Service Spouse Dual Guard/Reserve Spouse Dual Active Spouse
Race Code	White Native Hawaiian or Other Pacific Islander Asian Black American Indian or Alaskan native Multiracial
Race/Ethnic Code	American Indian or Alaskan Native Asian or Pacific Islander Black (not Hispanic) White (not Hispanic) Hispanic Other

Paygrade Group 5	E1-E4 E5-E9 W1-W5 O1-O3 O4-O6
Paygrade Group 6	Enlisted Officer
Basic Allowance for Quarters (BAQ)	BAQ with Dependents BAQ without Dependents Partial BAQ BAQ with Dependents, inadequate quarters NO BAQ, adequate quarters
Off Base / Basic Allowance for Housing (BAH) status	Off Base / Receiving BAH On Base / No BAH
Marital Status	Married Not Married
Family Status 2*	Single with Children Other
Years of Service	3 to 5 Years of Service

### ***Constructing the Frame and Drawing the Sample***

DMDC's August 2004 Active Duty Master Edit File (ADMF) was used in developing the sampling frame, constructing strata, and determining the sample size and allocation. The specified definition of the population, described above, resulted in a sampling frame with 1,358,334 eligible members. A non-proportional stratified, single stage random sample of 30,939 members was selected. Table 3 presents a summary of the sample allocation by Service.

**Table 3.**  
***Sample Allocation for the March 2005 Status of Forces Survey of Active-Duty Members***

	<b>Total</b>	<b>Army</b>	<b>Navy</b>	<b>Marine Corps</b>	<b>Air Force</b>
<b>Sample</b>					
Total	30,939	10,644	8,216	6,986	5,093
<b>Gender</b>					
Male	25,699	8,850	6,831	6,198	3,820
Female	5,240	1,794	1,385	788	1,273

Other Family	26,661	9,028	7,093	6,470	4,070

*Note: Counts for unknown are not included.*

## **Respondents**

### **Sample Losses**

The original sample file contained 30,939 records. Losses to the drawn sample are listed in Table 4 and reviewed here. Table 4 is limited to responses to the Web questionnaire as of April 11, 2005. Sample members were lost from the sample for three main reasons: (1) self-reported or other ineligibility for the survey, (2) an inability to locate the sample member, and (3) refusal to participate in the survey or other failure to respond to the survey.

A total of 159 sample members (0.51%) were lost from the final sample through classification as ineligible. Elimination of ineligible resulted in decreasing the sample to 99.49% (N=30,780) of its original size.

**Table 4.**  
***Final Sample Relative to Drawn Sample***

	<b>Sample Size n</b>	<b>% of Drawn Sample</b>	<b>Weighted n</b>	<b>% of Weighted Sample</b>
Drawn sample	30,939		1,358,334	
Ineligible on master files	0	0.00%	0	0.00%
Self-reported ineligible	-159	0.51%	-7,767	0.40%
Total: Ineligible	-159	0.51%	-7,767	0.40%
Eligible sample	30,780	99.49%	1,350,567	99.43%
Not located (estimated ineligible)	-65		-2329	
Not located (estimated eligible)	-4,392		-162,655	
Total not located	-4,329	14.20%	-162,655	12.15%
Located sample	26,386	85.28%	1,185,583	87.28%
Requested removal from survey mailings	-119		-4,964	
Returned blank	-11		-1,126	
Skipped key questions	-884		-38,913	
Did not return a survey (estimated ineligible)	-233		-9,077	
Did not return a survey (estimated eligible)	-15,535		-633,999	
Total: Non-response	-16,782	54.24%	-688,079	50.66%
Usable responses	9,604	31.04%	497,504	36.63%

In general, residential addresses were used as the primary addresses of choice. In cases where residential addresses could not be identified, however, unit addresses were used. Procedures used to locate members are explained in a later section that describes the Survey Control System. Because of this address update procedure, only 14.2% of the drawn sample (4,394 of 30,939) was lost because the sample members could not be located. Personnel records for this group had missing, incomplete, or out-of-date addresses, and steps designed to obtain complete, current addresses for these records were unsuccessful.

Losses attributable to either ineligibility or unlocatability resulted in a sample that was 85.3% of the drawn sample. Individuals in this remaining sample may be further categorized as nonrespondents versus respondents. Nonrespondents included the following groups: sample members who contacted the operations contractor (by mail, fax, e-mail, Web, or telephone) and asked to have their names removed from the survey mailing list, and 15,768 sample members who did not return a survey.

Respondents included all sample members who completed on the Web 50% of applicable questions<sup>2</sup>. At the conclusion of the survey fielding, 9,604 eligible, locatable sample members had returned usable surveys

### ***Location, Response and Completion Rates***

The Council of American Survey Research Organizations (CASRO) noted that varying operational definitions of response rates can lead to problems or confusion (e.g., when awarding contracts requiring pre-specified response rates or when interpreting the results of a survey). As a result, CASRO formed a task force to recommend guidelines for standardizing the operational definitions of response rates.

Beginning in 1995, DMDC standardized its methods for calculating response rates and completion rates using procedures patterned after those advocated by CASRO. More specifically, the new DMDC procedures closely follow CASRO's Sample Type II design (see Council of American Survey Research Organizations, 1982).

Table 5 provides location, response, and completion rate information using only the Web responses. The location rate is defined as the proportion of eligible sample members that were locatable. The response rate is defined as the proportion of eligible sample members that returned usable surveys, while the completion rate is defined as the proportion of the located sample that returned usable surveys.

---

<sup>2</sup> Applicable questions are those to be completed by all respondents and excluded items that could be skipped over depending on prior answers.

**Table 5.**  
***Location Rates, Response Rates, and Completion Rates***

	<b>Observed Operational Rates</b>	<b>Weighted Operational Rates</b>
Location rate for eligible	85.8%	87.9%
Completion rate for eligible	36.7%	42.3%
Response rate for eligible	31.5%	37.2%

### ***Survey Development and Administration***

The survey was hosted on the operations contractor's secure Web site so that sample members could complete the survey online. At the entry point to the survey, members were prompted for their personal ticket number to gain entry to the survey. The Privacy Notice and a page of frequently asked questions (FAQ's) were also posted on the Web site.

The survey allowed respondents to return to the previous page or move to the next page. In addition, buttons located below the last question on each page allowed the respondent to clear their response(s) or save and exit the survey. Questions were answered by clicking on radio buttons, check boxes or by making a choice from a drop-down list. The respondent could change answers or could save, exit, and return at another time to change answers. The final page had another "Save and Exit" button and a "Done" button, both with full text explanation of their functions.

### ***Survey Administration***

The survey administration process began in February 2005, with mailouts of notification letters to sample members (minus original ineligible). Second notifications were sent by e-mail within 24 hours after the survey was available on the Web and six (6) reminder e-mails were sent to those for whom we had e-mail addresses.

### ***Survey Control System***

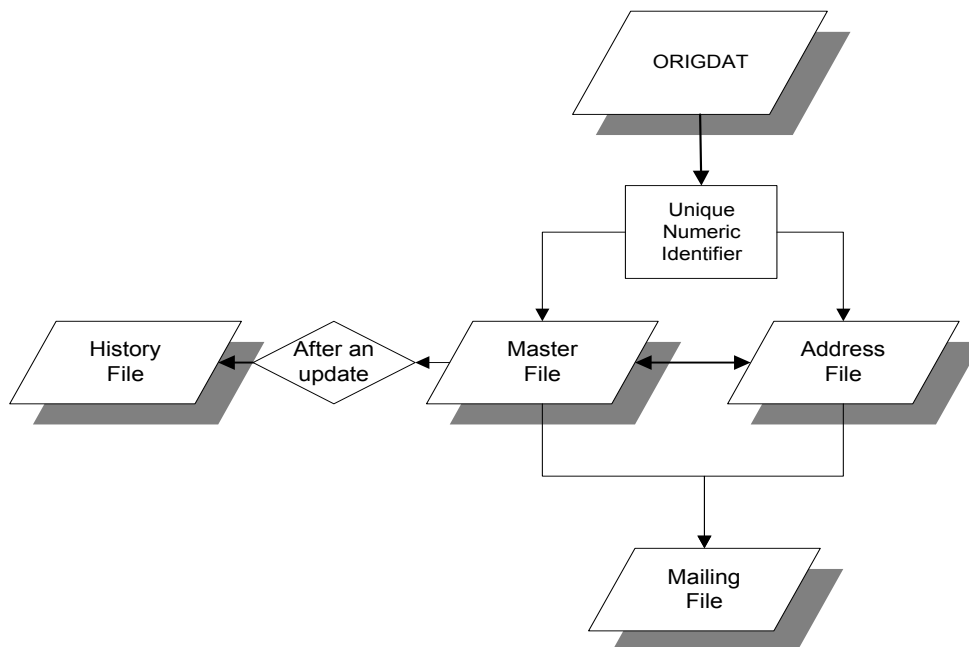

The Survey Control System (SCS)<sup>3</sup> was used to monitor the data collection process and to track all data transactions over the course of the survey administration. The datasets in the SCS include sample members' names and addresses, but do not contain data obtained from the survey instruments. Because of privacy concerns, SCS datasets are not available for public release.

The operations contractor uses the SCS to store and update project data, monitor mailings, respond to documents returned as postal non-deliverables (PNDs), and determine survey participation and eligibility status. The SCS consists of five datasets: the ORIGDAT file, the ADDRESS file, the MASTER file, the HISTORY file, and the MAILING file. The files are

<sup>3</sup> In this document, the term SCS refers to the set of data files as well as the program or operating system which maintains those files.

linked relationally by INRECNO, a unique individual identification number that is assigned to each sample member when the record was loaded into the SCS. Figure 1 displays the interrelationships among those datasets.

**Figure 1.**  
*Survey Control System*

**ORIGDAT file.** The ORIGDAT file consists of 30,939 records, one record for each member of the sample. It is the original sampling frame file sent to the operations contractor by DMDC. The original file is loaded onto the operations contractor's computer system and converted to a SAS<sup>4</sup> dataset. As the file was converted into a SAS dataset, the SCS generated a unique identification number (INRECNO) for each record. This number identifies the sample member throughout the SCS and also in returns data sets, comment text files and other specify text files. The names and some demographic data from the ORIGDAT file were loaded into the MASTER file in preparation for the first mailing. The addresses from the ORIGDAT file were loaded into the ADDRESS file.

**ADDRESS file.** The ADDRESS tracked the postal and e-mail addresses that were maintained for each sample member. The ADDRESS file contains one record for each postal and address for each sample member (e.g., if there were five addresses located for one sample member during the survey administration, that sample member has five separate records in the ADDRESS file) yielding an ADDRESS file containing 117,678 records. Each record is uniquely identified by the combination of INRECNO (identifying the sample member) and an address

---

<sup>4</sup> SAS® is a registered trademark of SAS Institute Inc., Cary, NC, USA.

number (ADDRNO) assigned to each address. This address number is the sequential order of receipt of the address for a particular sample member. For example, if a sample member has one address record in the ADDRESS file, the address number for that record is one. If the sample member faxed in a change of postal or e-mail address or a credit bureau forwarded an updated postal address for that sample member, the new address was added as address number two. The ADDRESS file was initially loaded with postal and e-mail addresses from the ORIGDAT file. Each record in the ADDRESS file includes the sample member's INRECNO, SOFA0503, ADDRNO, address, the source of the address, and address priority code, a variable indicating whether the record is the highest priority address for this sample member, and variables indicating whether the address successfully reached the sample member.

The priority code assigned to a given address number for a sample member was used to determine the "best" or "highest priority" address for the sample member at any given time. It was originally determined by the source of the address. Address updates obtained directly from a sample member received a priority number of one. The order of priority of address sources from "highest priority" to "lowest priority" is as follows, respectively:

1. updates directly from a sample member (call, fax, e-mail, Web update or letter)
2. address corrections from the U.S. postal service (ACS [electronic address change service], ACRs [address correction requests], and ODFs [out-of-date-forwarded mail])
3. NCOA-updated addresses
4. credit bureau-updated addresses
5. DEERS residential addresses
6. DEERS unit addresses

**MASTER file.** The MASTER file is used by the SCS to select records for upcoming survey mailings. This file includes a record for each member of the sample and was initially created by extracting data from each record in the ORIGDAT file. Each MASTER record includes the sample member INRECNO, SOFA0503 and the address number for the highest priority postal and e-mail address in the ADDRESS file for this sample member. The MASTER file accommodated data updates through an automated process (e.g., updating the address number in use after the receipt of a postal or e-mail nondeliverable or Web update) or manual key entry (e.g., updating information in response to a telephone call, fax, letter return or e-mail from a sample member). As new information was received for a particular record (including changes to the highest priority address), the SCS updated the MASTER record (N=30,939) and wrote the old record to the HISTORY file. The MASTER file also contains a set of variables which summarize the sample member's participation in each of the mailings.

**HISTORY file.** The HISTORY file is a chronicle of the changes that occurred to the MASTER file. Each HISTORY record is a subset of an outdated MASTER record with the addition of a date and time stamp as the record is updated. That is, a HISTORY record is created when there is a name, address, paygrade, or eligibility status change in the MASTER file. Thus, the HISTORY file contains as many observations as there are updates to the MASTER file.

***MAILING file.*** The MAILING file tracked all survey mailings (postal and e-mail). This file contains one record for either an item postal mailed or e-mailed during the survey administration or for tracking postal address updates from credit bureaus (N=196,918). Each MAILING record includes the SOFA0503, INRECNO, address number used, date of mailing, mailing status, type of mailing, and the mailing identification code (MIC).

## ***Address Update Procedures***

### ***Initial Address Updates***

Prior to the first mailing, the operations contractor ran all domestic residential addresses through Group 1 software to be formatted to conform to U.S. Postal Service standards. Once the addresses were standardized, they were sent to an outside vendor where they were checked against the National Change of Address (NCOA) database. The NCOA software updated the address records (in standardized format) based on change-of-address cards filed with the U.S. Postal Service. The updated NCOA address file was returned to the operations contractor and integrated into the SCS. The NCOA-updated addresses were added to the ADDRESS file and became the current ADDRNO with the “highest priority code assigned” in the MASTER file.

After the NCOA-updated data was added to the SCS, another file was compiled of sample members who had an incomplete address or an address identified by NCOA as an undocumented move (i.e., the sample member had moved, but NCOA did not have a new address). The operations contractor sent copies of this file to three credit bureaus (Experian, Trans Union and CSC Credit Services)<sup>5</sup> to determine whether a complete, up-to-date address for these sample members could be found. The results were integrated into the SCS, updating records in the ADDRESS file.

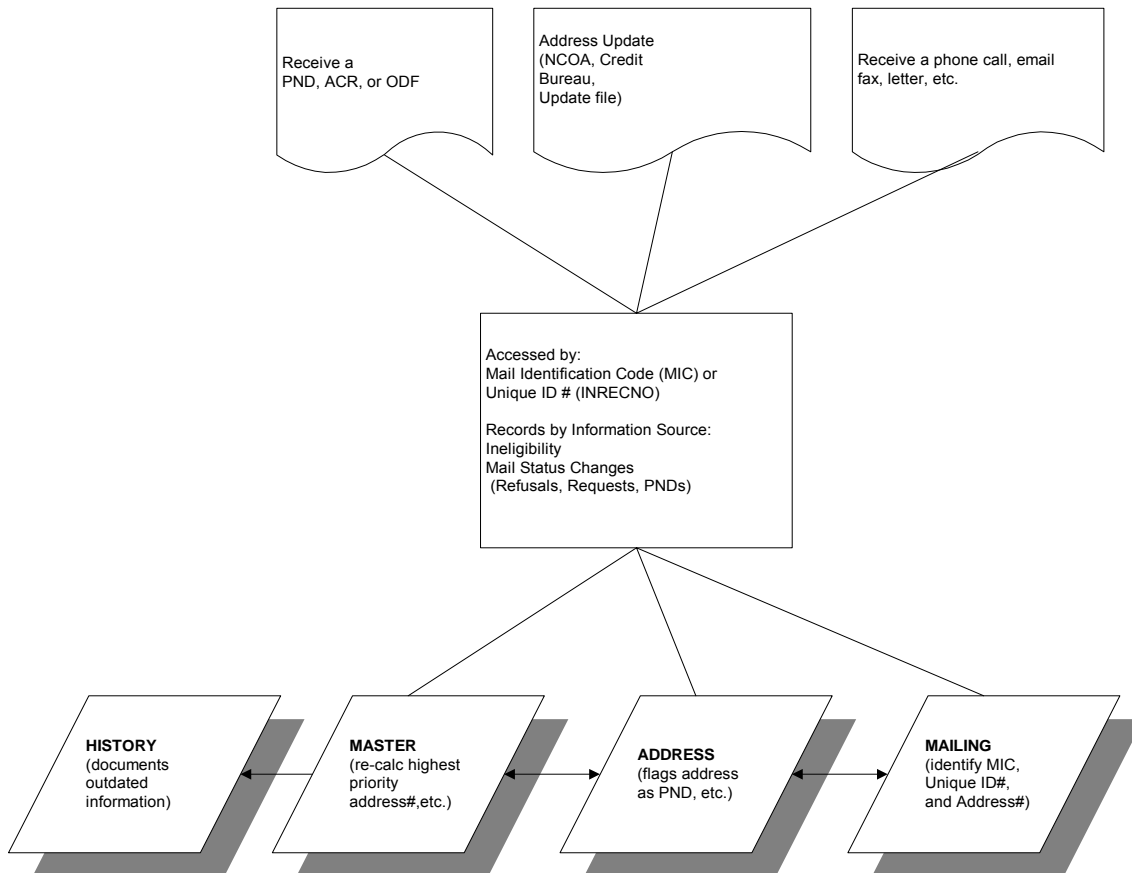

### ***Ongoing Address Updates***

Address update procedures also occurred when (a) additional address records were received after NCOA processing, (b) a survey document was returned as undeliverable, (c) a sample member self-reported a name, rank, or address change, or (d) the U.S. Postal Service forwarded address correction information. Figure 2 outlines these procedures.

---

<sup>5</sup> Experian, Trans Union and CSC Credit Services are outside vendors with consumer-credit information databases. Social security numbers of sample members with incomplete or out-of-date address information were forwarded to the vendors for address updates when the mailing dataset contained no valid address.

**Figure 2.**  
***Address Updating Procedures***

As a new address was entered into the ADDRESS file, its source (NCOA, credit bureau, postal Address Correction Requested card, telephone call, fax, letter, Web, and e-mail) was recorded and a new address number was assigned. The priority assigned to the address was based upon the source of the update and the date and time of the address (see the description of priority, for the ADDRESS file). At any given time, the current address used corresponded to the address number with the highest priority code.

If all known addresses for a sample member were returned PND, the sample member's record in the MASTER file was flagged "no address available." All "no address available" records were forwarded to the three credit bureaus. The credit bureaus returned files containing addresses for each submitted record, with the date on which the credit bureau received the address. If more than one address for a sample member was received from credit bureaus, the address number corresponding to the address with the most recent receipt date received the highest priority code. If one or more of the credit bureaus returned a previously unattempted address, the MASTER and ADDRESS files were updated and a re-mail was sent to the sample

member. If none of the vendors had an updated address for the sample member, the operations contractor designated the sample member “nonlocatable” and stopped further mailings.

## ***Processing of Updates***

### ***Updates from Sample Members***

Updates from sample members could be communicated via the toll-free telephone number (either by speaking to the operations contractor’s Call Center staff or by leaving a voice mail message). In addition, sample members could mail, fax or e-mail updates or go to the survey Web site and enter updates. The updates made on the Web site were before the start of the survey and were loaded to the system every three days (to coincide with the notification mailing or re-mailing schedule). Other updates were entered into the SCS by the operations contractor’s Call Center staff by the next morning.

### ***Updates from the U.S. Postal Service***

There are several types of address updates provided by the postal service. They are detailed below; each includes a description of the processing steps.

1. Postal Non-Deliverable Mail (PND): The sample member moved and no forwarding address was available. The mail piece was returned to the operations contractor. the operations contractor removed the letter from the envelope and scanned it to capture the Mailing Identification Code (MIC) in the lower right corner. A file of the MICs was loaded to the Survey Control System so the records could be updated as PND. This was done every three days (to coincide with the mailing/re-mailing schedule). If the sample member had another address on file (e.g., the unit address), that address was used. If not, the Social Security Number was sent to the credit bureaus in search of a new address.
2. Address Correction Requests (ACR; hard-copy): Some post offices are not equipped to provide address corrections via ACS (the electronic service), so they provided the corrections via hard copy cards that were sent to the operations contractor. The corrections were key-entered by operations contractor’s Call Center staff, typically by close of business the next day but no later than prior to the preparation of the next mailing.

## ***Survey Materials and Their Distribution***

Each eligible sample member received at most four original mailings: a notification letter, a reminder letter, a second reminder letter, and a third reminder letter. The notification and first reminder mailings contained a letter and brochure (which provided sample members with answers to common questions about the survey). The second and third reminder letters contained only a letter. A sample of letters and e-mail communications and brochure is provided in Appendix B.

In addition, e-mail was used to communicate with sample members. Not every sample member had an e-mail address. However, for those sample members for which we had an e-mail address, they received at most seven e-mails: an announcement and six reminders.

### ***General Mailing Procedures***

Prior to every mailing, the SCS searched the records in the MASTER file to identify which records should be excluded (e.g., sample members self-reported as ineligible for survey participation, sample members who had already returned survey forms, and members with no valid addresses available). For re-mails (sent between mailings), the SCS identified only those records that had been updated since the prior mailing. More specifically, the SCS identified records that had resulted in PNDs or had been manually flagged for re-mailing (e.g., in response to a sample member calling the operations contractor stating she or he had received a reminder/thank you letter but had not received a survey, etc.).

Once all records for a particular mailing or re-mailing were identified, the SCS processed the records based on whether or not the mailing would include a survey form. If the mailing group was large enough to lead to a cost savings from sorting, the records were run through Group 1 postal software to sort the records according to first-class presort postal regulations. After this procedure, a unique Mail Identification Code (MIC) was assigned to each record. The MIC was assigned either from the survey litho code list if a survey form was sent or independently if only a letter was sent.

### ***Ticket Numbers for Web Survey Access***

Prior to the first mailing, a list of ticket numbers<sup>6</sup> for Web survey access was randomly generated. One secure ticket number was assigned to each sample member and remained linked to that member for the duration of the project. That is, while a member's MIC or lithocode changed with each mailing as described previously, the member's ticket number did not change. The member's unique ticket number was printed (along with the survey URL) in each letter, e-mail and brochure sent to that individual. A member could not access the Web survey without using his or her ticket number.

### ***Description of Letters***

Letters were printed with the record's unique MIC listed in the address field and on the lower right corner of the letter. If the mailing includes only letters (no survey forms), the letters were folded and machine inserted into window envelopes and sent by first class mail. Mailings that included a brochure or survey followed the same procedure through the letter printing process. The MIC on the brochure or cover letter was used to pair the letter with the correct enclosure. During the matching process, ten percent of the mailing was visually checked, comparing numbers printed on the letter with the brochure or survey number for quality control. Any mismatched pairs initiated further investigation of the matching process. This procedure ensured that each survey was sent to the person designated to receive it. Depending on the

---

<sup>6</sup> Ticket numbers are eight alpha numeric characters generated at random.

sample size, the letters and matched surveys were machine or hand inserted into envelopes, metered if necessary, and sent by first class mail.

The status of each mailing was tracked throughout the data collection so that address-correction information could be incorporated into all relevant mailings. When a mail piece came back PND, the next mail piece was sent to a new address (if one could be obtained during the mailing period). For all mailings, mail pieces that came back PND, re-mails were completed if a newer/updated address could be found.

DMDC provided the operations contractor with the text, letterhead and signature for the cover letters. The letters explained why the survey was being conducted, how the survey information would be used, and why participation was important. (See Appendix B for copies of the letters.) The letters were approved and printed on letterhead from the office of the Under Secretary of Defense. The letters were signed by the Under Secretary of Defense (Personnel and Readiness) David S.C. Chu.

The letterhead and signature were printed in blue, and the text and recipient information of all letters were printed in black. In addition to including a name and address (which was also used as the mailing information for the window envelopes), each letter included a personalized salutation. The salutation addressed each sample member by his/her rank. For example, a letter to a Navy E5 with the last name Smith would have included the salutation, "Dear Petty Officer Smith". Similarly, an Army O3 named Jones would have received a letter starting, "Dear Captain Jones". The address block also included service branch; for example, "Petty Officer John Smith USN" or "Captain Mary Jones USA".

### ***Mailouts***

Table 6 lists the mailing dates and return results for each of the mailouts and re-mailings. For the notification mailing, a letter along with a brochure was inserted into a #10 window envelope. The letter notified sample members that they were selected for this Web survey and encouraged their participation. The notification letter was mailed to 30,904 sample members on February 14, 2005.

The first reminder informed sample members of the live Web survey date and requested participation. For this mailing, a reminder letter and brochure were inserted into a #10 window envelope. The first reminder letter was mailed to 30,903 sample members on February 23, 2005.

A second reminder letter was sent to 27,210 sample members. The mailing was sent out March 10, 2005. The letter, inserted into a #10 window envelope, thanked sample members for completing the survey if they had done so, and reminded them to complete the survey if they had not.

A third reminder letter was sent to 24,256 sample members. The mailing was sent out March 22, 2005. The letter, inserted into a #10 window envelope, thanked sample members for completing the survey if they had done so, and reminded them to complete the survey if they had not.

**Table 6.**  
***Mailing Timeline and Return Results***

<b>Mailing Numbers and Groups</b>	<b>Print File Creation Date*</b>	<b>Mail Drop Date</b>	<b>Number Sent</b>	<b>Number of PNDs</b>
Notification Domestic	2/4/05	2/14/05	30,858	4,891
Notification Foreign	2/4/05	2/14/05	46	23
Subtotal: Notification			30,904	4,914
Reminder Domestic	2/16/05	2/23/05	30,857	4,810
Reminder Foreign	2/16/05	2/23/05	46	25
Reminder Domestic Re-mail 1	3/2/05	3/3/05	1,930	471
Reminder Domestic Re-mail 2	3/7/05	3/8/05	583	165
Subtotal: Reminder			33,416	5,471
Reminder 2 Domestic	3/4/05	3/10/05	27,186	3,043
Reminder 2 Foreign	3/4/05	3/10/05	24	7
Reminder 2 Domestic Re-mail 1	3/17/05	3/21/05	2,449	379
Subtotal: Reminder 2			29,659	3,429
Reminder 3 Domestic	3/16/05	3/22/05	24,239	1,091
Reminder 3 Foreign	3/16/05	3/22/05	17	0
Reminder 3 Domestic Re-mail 1	3/29/05	3/30/05	1,001	4
Subtotal: Reminder 3			25,257	1,095

\*Print file creation date: This is the date records were identified for inclusion in the mailing and written to a print file.

E-mail was used to communicate with sample members. There were three sources for e-mails. First, each sample member had the opportunity to provide up to two personal e-mail addresses on the survey Internet site prior to start of the survey. The second source for e-mail addresses was the DEERS database. The third source were e-mail addresses purchased from an outside vendor (N=4,670). The outside vendor maintains a customer database of e-mail addresses that has been lawfully collected and compiled from consumers pursuant to a notice that advised them that their personal data was being collected. Table 7 below shows the percent of sample members for whom we had at least one valid e-mail by Service.

**Table 7.**  
***E-mail Address Availability by Service***

	<b>Army</b>	<b>Navy</b>	<b>Marine Corps</b>	<b>Air Force</b>	<b>Total</b>
Valid address available	60%	39%	29%	56%	47%
No valid address available	40%	61%	71%	44%	53%

At the start of the survey, sample members with e-mail addresses received an announcement which informed them the survey was active and ready for completion. An additional six e-mail reminders were sent throughout the survey field period. Table 8 lists the e-mail dates and e-mail addresses bounced. E-mail addresses “bounced” identifies sampled individuals that supplied an e-mail address but the address was invalid at the time DMDC attempted contact. This is analogous to a postal PND. E-mail address “sent” is not the same as e-mail received. It is analogous to the non-PND return experienced during a mailed survey. It is not known if the mail was delivered to the intended individual, only that it was not returned.

**Table 8.**  
***E-mail Communication Timeline***

<b>E-mail Numbers</b>	<b>E-mail Drop Date</b>	<b>Number Sent</b>	<b>Number Bounced</b>
Announcement	2/28/05	19,037	4,609
Reminder 1	3/4/05	12,186	447
Reminder 2	3/10/05	10,356	174
Reminder 3	3/16/05	9,357	167
Reminder 4	3/22/05	8,717	68
Reminder 5	3/28/05	8,219	60
Reminder 6	4/1/05	7,815	35

### ***Processing Returned Surveys***

Once a respondent completes an online survey, data are stored in an indexed file on the Web (data) server. Prior to providing each dataset to DMDC, the operations contractor copied the indexed file to their internal network using FTP protocol.

The data are then converted to a sequential format, and the validate program reads and loads the data to the dataset.

### ***DMDC Coding Scheme***

To convert the raw data into the item scores that appear in the basic survey data file, DMDC provided the operations contractor with the coding notes (contained in Appendix D) and an annotated copy of the survey form (Appendix C). Every attempt is made to capture all information from completed surveys and preserve the data so that secondary analysts can later create variables that were not anticipated by DMDC researchers. To accomplish these goals,

DMDC subscribes to a variety of coding conventions for all of its surveys. See Appendix D for in-depth coverage of these coding conventions.

DMDC uses “forward” coding when coding inconsistent answers in items with skip patterns. Data on the starting question accepted as marked and data for the items within the skip pattern are edited to be consistent with the starting question. However, an unedited version of each item is preserved in a confidential dataset. By preserving the unedited data, recoding can be done if ever required.

### ***Coding or Keying Open-Ended Items***

The Web survey contained six open-ended items. The original text responses from the six “other specify” response options were captured verbatim into a SAS<sup>®</sup> data set that is linked by the unique identification to the survey data. Text data in the SAS<sup>®</sup> files for open-ended items were spell-checked, and profanity, proper names, and locations were replaced with “(expletive),” “(name),” and “(location)” respectively.

For all open-ended items, the Web data file contains a flag indicating whether the respondent wrote anything in response to the item. Discrepancies existed where the Web data indicated presence of a comment but no comment was there.

### ***Fifty-record Check***

After receiving the first 50 returned records, the operations contractor ran a “50-record check.” DMDC checked the resulting data to determine if there were any unanticipated problems in the coding procedures (e.g., respondents were consistently answering in an unexpected manner). Minor corrections to these procedures were necessary as a result of this check and were reviewed by DMDC prior to production of the initial SAS<sup>®</sup> dataset. At the completion of the 50-record check, the operations contractor compiled the full set of returned surveys. The data were then cleaned and edited.

## **Survey Analysis Files**

This section (a) provides an overview of requirements for analysis of the data, (b) documents the structure of survey analysis files created for the March 2005 survey, (c) describes the assembly of the analysis files, and (d) provides an overview of the variables in the survey analysis files.

### ***Estimation***

Data were collected from a non-proportional stratified, single stage random sample. Responses were weighted up to population totals adjusting for differential sampling and response rates in demographically homogenous groups. In general, the procedures used to compute sample estimates of population parameters (including population totals, means, proportions), tests of hypotheses, regression relations, and their associated variances are derived from the probability structure that gives rise to the observations. As with other surveys involving

complex probability structures, most of the parameter estimates of interest in this survey take the form of non-linear statistics. Examples include domain means and proportions where the denominator values are unknown and must be estimated from the sample data. The estimator takes the form of a ratio of random variables (i.e., the ratio of the estimated numerator and denominator totals or counts). In general, ratio estimates are not unbiased and their variances cannot be expressed in closed form. The variances are, therefore, approximated. The bias in a ratio estimate depends on the variance associated with the denominator total or count and can usually be ignored in samples having a large number of observations. As a working rule, the bias may be assumed negligible if the number of observations on which the estimate is based exceeds 30 or is otherwise large enough so that the coefficient of variation  $[SE(x)/x]$  of the denominator is less than .10 (cf., Cochran, 1977, pp. 153-165).

Approximations for the variances commonly take the form of Taylor series linearizations or replicate methods such as those based on resampling methods. Variables have been included in the analyses files so that variance estimates can be based on Taylor series linearizations computed by SUDAAN<sup>7</sup> for a stratified, without replacement design.

Many of the standard statistical software packages, such as SPSS<sup>8</sup> and older versions of SAS,<sup>9</sup> do not properly compute variance estimates from weighted data that were collected with a design other than simple random sampling. Variables have been included in the analysis file so that Taylor series estimates can be made with SAS PROC SURVEYMEAN and PROC SURVEYREG.

Analyzing the dataset with the proper use of the appropriate eligibility indicator (ELIGFLGW) and analysis weight (FINALWGT) in standard statistical programs will result in accurate point estimates but will not result in accurate variance estimates. Wolter (1985) provides a detailed discussion on methods used for variance estimation from sample surveys including replication, Taylor series approximation, and analytic methods.

### ***Data Structure***

Care was taken in the preparation of the survey analysis files to provide public access to data from the survey with sufficient information for accurate estimations, while meeting requirements for participant and non-participant anonymity. As described below, some detailed variables have been deleted from the basic survey files either because (a) they are typically needed only to analyze survey methods and not needed to analyze the survey data or (b) they provide too great a chance of identifying an individual. For the latter reason, some demographic variables are available on public files only in a collapsed version.

In addition to a basic survey file, a confidential file (containing a more complete set of variables than the basic survey file) has been prepared for internal DMDC use. Files were

---

<sup>7</sup> SUDAAN® is a registered trademark of Research Triangle Institute, Research Triangle Park, NC, USA.

<sup>8</sup> SPSS® is a registered trademark of SPSS Inc., Chicago, IL, USA.

<sup>9</sup> SAS added survey procedures in Version 7, expanding them in releases 8.0 and higher.

prepared as SAS and SPSS system files. An ASCII (Operating System or OS) flat file was prepared from the basic survey SAS system file. File names are indicated in Table 9.

**Table 9.**  
***Analysis File Names***

Type of File	File Name
Basic Survey File – SAS	SF0503AP.7BDAT
Confidential File – SAS	SF0503AC.7BDAT
Basic Survey File – SPSS	SF0503AP.POR
Basic Survey File – OS	SF0503AP.DAT

The structure of the confidential file is shown in Figure 3. The confidential file contains the basic survey file plus additional confidential variables.

All variables in the confidential file are documented in this report. Appendices E and F list all variables with a notation to indicate which variables are confidential, and show where each variable is documented. Intermediate weighting variables that appear only in the confidential file are documented by Riemer and Kroeger (2002) and DMDC (2005a). Variables that appear in collapsed form in the basic survey part of the file and in a fuller version only in the confidential file are discussed later.

## ***Analyses***

Both the confidential file and basic survey file contain 30,939 records, one for every sampled individual. As depicted in Figure 3, these records can be divided into 3 subgroups. The *Nonrespondents* subgroup, includes all records indicated by ELIGFLGW=3, where no usable Web response was received or no information was received to indicate ineligibility (n=22,691).

Assignment of a record to the other two subgroups was based on whether (a) an individual returned a “completed” survey; and (b) the person was eligible to be included in the population of interest. Final eligibility was limited to those in the August 2004 Active Duty Master File (ADMF) and who were also in the October 2004 DEERS Medical PIT extract and did not contact the operations contractor to indicate that they were ineligible.

Records required for analyses are those in the *Known Ineligibles* and *Eligible Respondents* subgroups. Both the *Eligible Respondents* (ELIGFLGW=1) and *Known Ineligibles* (ELIGFLGW=2) are included because both types of records were used to develop weights that sum to the population total, and both types of records are needed to compute accurate variance estimates by the Taylor series linearization method implemented by SUDAAN and SAS PROC SURVEYMEANS.

To analyze the Web responses use the analytic weight, FINALWGT, with the file subset by ELIGFLGW.

**Figure 3.**  
***The Structure of the Confidential File***

Subgroups	Basic Survey File	Confidential and Detailed Methodological Variables	Web Eligibility Flag Value and Number of Records
Nonrespondents			ELIGFLGW=3 n= 16,782
Known Ineligible			ELIGFLGW=2 n=159
Eligible Respondents			ELIGFLGW=1 n= 9,604

Note. The shaded portion represents the subset of the data typically required for analysis.

### ***Variables in the Survey Analysis Files***

#### ***Basic Survey File***

The variables in the basic survey file fall into five categories: (1) derived from survey responses, (2) created by the operations contractor to document survey operations, (3) created to analyze the weighted dataset, (4) created by DMDC for analysis, and (5) extracted from administrative personnel records. Variables are grouped in these categories in Appendix F.

***Information gathered on the survey.*** These variables came directly from the survey or were constructed using only information from the survey. There is at least one variable for every item in the survey except for a few items that had to be removed to preserve confidentiality. The annotated questionnaire (see Appendix C) contains the item names, the values used to code the pre-specified alternatives, and references to applicable coding notes in Appendix D.

Although the first part of Appendix D extensively documents the conventions that DMDC uses to name survey variables, a brief overview of the naming convention is also given here. In general, the survey-derived variables can be classified as variables that begin with either “AH,” “SR,” or “X.”

The naming of “AH” variables is reviewed using the example variable, “AH052A.” For the *March 2005 Status of Forces Survey of Active-Duty Members*, variables names begin with “AH” to denote the population (active duty) and the version of survey (eighth active-duty Web survey) in this series. The ending three or more numbers or letters correspond to the questionnaire item. In this example, the third through fifth digits indicate the main question number (052A) and the sixth digit (if any) indicate the sub-question item, such as (in this example) item A from a list of items in question 52. When possible, “X” is reserved to create special crossing (marginal) variables for key analyses. “X” variables typically involve

imputation for missing data and, like “SR” variables, are intended to be consistent across DMDC surveys.

There are some variables in the dataset that are not labeled “AH” although they are survey variables. These variables are named unconventionally due to the expectation that they will reoccur in future surveys. This process aids in future analysis needs. For example, “CPAYRA” is the variable name for the item that asks sample members how important certain factors are in determining military compensation. This question will be asked in future surveys.

The “SR” variables are a set of primarily demographic items that are identically named across all DMDC surveys. The “SR” serves as a mnemonic for self-report with the remainder of the name indicating the data being collected. For example, “SRRACE” is the variable name for the item that asks sample members what race they consider themselves to be. Although all survey data are self-reported, the “SR” is used to distinguish survey-reported information from DMDC-provided information (e.g., “SRRACE” from the survey versus “RACE” from DMDC databases).

***Variables constructed for analysis.*** Certain demographic variables, including some information collected on the survey, had to be censored to preserve the anonymity promised to survey respondents and nonrespondents. For example, FUER is a recoding of FUE. An “R” as the last letter of a variable listed in Appendices E and F is an indication that the variables may have been recoded to create special analysis variables and that the original variable is available only on the confidential analysis file.

Certain key demographic variables were constructed for DMDC analyses. These analytic variables, starting with “X,” are based primarily on self-reported information from the survey. Typically, where the self-reported information was missing on important demographics (e.g., Service, paygrade, location, respondent gender, education, race or ethnicity, family or marital status) data were imputed from member’s administrative record.

The race and ethnicity questions were combined to be reported in accordance with the Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity (1997). Furthermore, a change was made in how responses were coded. In previous tabulations, mutually exclusive categories were developed to represent how these questions were answered by respondents. Starting with the current survey, however, all responses will be tabulated. Also, items were combined to derive spouse employment indicators based on U.S. Census Bureau’s Decennial Census and Current Population Survey (2002).

Appendix I documents many of the decisions made in the analyses reported by DMDC (2005b). For a large number of survey items, analysts must make decisions on the treatment of special codes used to indicate inconsistencies in the survey data, especially on respondent failures to follow skip pattern directions.

***Information on operations.*** The DMDC-provided identification number, SOFA0503, is unique and is used to identify responses as they are processed. Other variables are created by the operations contractor but are too detailed to be in the basic survey file.

**Information from sampling and record data.** Most of the variables used in sample design and selection are too detailed to be in the basic survey file (see the later section on confidential variables).

**Information on weighting.** Derivation of weights is discussed in detail in DMDC (2005a) and Riemer and Kroeger (2002). See Appendix J for examples of analyses using these variables:<sup>10</sup>

ELIGFLGW	Eligibility Flag
FINALWGT	Final Weight with Non-response and Postratification Adjustments
V_STRAT	Variance Estimation Strata
_TOTAL_	Weighting Class Strata Totals Based on Sampling Frame Counts

## **Confidential File**

In addition to variables on the basic survey file, the confidential file also has five additional categories of variables: (1) the uncensored version of survey items that appear in a collapsed form in the basic survey section, (2) the uncensored version of key demographic variables used in analyses that appear in a collapsed form in the basic survey section; (3) detailed variables created by the operations contractor to document operations, (4) detailed variables used in sampling, and (5) detailed variables used in weighting. Variables are grouped in these categories in Appendices E and F.

**Confidential variables—survey data.** This section of the confidential file contains the original full version of survey variables that had to be recoded for the basic survey file to preserve confidentiality. To the extent possible, recoded versions of these variables are in the basic survey file section for variables constructed for analysis.

**Confidential variables—analysis data.** This section of the confidential file contains the original full version of analytic variables constructed by DMDC. To the extent possible, recoded versions of these variables are in the basic survey file section for variables constructed for analysis.

**Confidential variables—operations data.** This section of the confidential file contains operational variables created by the operations contractor. These variables are useful for methodological studies and/or were used in determining eligibility and response status.

The identifying variables describe how the record was processed once a survey was returned. The variables BATCH, SERIAL, and LITHO uniquely identify each returned survey. LITHO is the lithocode scanned from the survey. BATCH and SERIAL are the codes printed on the survey during scanning to identify the scan batch number and scan order of each survey. These numbers can be used to retrieve the paper copy of a survey for a short time after it has

---

<sup>10</sup> Two additional variables required for SUDAAN are on the dataset but not discussed in Appendix J: NPSTRAT, poststratification population counts; and, PSTRATA, poststratification strata.

been scanned (e.g., should researchers want to check electronically-stored information against the respondent's answer on the paper survey). SCANDATE is the date the survey was scanned and INRECNO is the unique identification number assigned to each record. MAILING identifies which survey (i.e., the first-, second-, or third-wave mailing) the respondent returned. DUPRET and DUPRET2 indicate the receipt of multiple returns. DUPRET2 includes blank returns in the multiple counts; DUPRET excludes these returns.

The classification variables describe how individual sample member's records were grouped and indexed. FLAG\_FIN indicates the final disposition status of a sample member (i.e., survey returned, blank survey returned, not locatable, or no return). Several other classification variables were used to categorize a survey's final disposition. These variables are: BLKREAS, SCSINEL, and REFUSE. BLKREAS codes the reason given by the sample member for returning a blank survey, SCSINEL indicates the reason given by the sample member for being ineligible, and REFUSE indicates whether a sample member refused to complete a survey.

***Confidential variables—sampling and record data.*** This section of the confidential file contains administrative file variables and constructed variables used in determining the sampling design. It also includes the sampling strata identifiers and counts.

***Confidential variables—weighting.*** This section of the confidential file contains variables used in analysis of non-response and in the construction of the weights.

### ***Using Appendix G***

Regardless of whether analysts use all or only portions of the database, all analysts should replicate the results found in the tables in Appendix G. It is only by replicating these results that analysts can be sure that they are reading the data correctly. An annotated example of an Appendix G table is listed in Figure 4. (However, table does not reflect actual results.)

**Figure 4.**  
**Annotated Example of a Table from Appendix G**

<sup>1</sup>March 2005 STATUS OF FORCES SURVEY OF ACTIVE DUTY MEMBERS

Taking all things into consideration, how satisfied are you, in general, with each of the following aspects of being in the military?

<sup>2</sup> SATMLA      <sup>3</sup>Your total compensation (i.e., base pay, allowances, and bonuses)

<sup>4</sup> OS DATA		<sup>5</sup> SAS DATA

<sup>12</sup>PERCENT TOTAL DOES NOT = 100 DUE TO ROUNDING ERROR.

<sup>13</sup>G-2

**1. Codebook title and item text.** The codebook title is the same for every table in Appendix G of this codebook. It lists both the general study and the specific survey form being summarized. If applicable, the indented text under the title presents the verbatim question or instructions that accompany a specific item in the survey.

**2. Variable name.** The variable name for a survey item is up to eight characters in length and corresponds to the variable name that is used in the SAS<sup>®</sup>-based, basic survey data file. The conventions for naming survey-derived variables are documented in Appendix D. Appendix F contains a full listing of the basic survey file variables, as well as short descriptions of what the variables document.

**3. Survey item text.** For survey items, this text is the verbatim item wording. For other variables, this text provides a verbal description of the variable.

**4. Location of the item on the OS data file.** This block provides the location of the variable on the OS (ASCII) data file. The OS data block documents (a) the starting and ending column numbers where the data are stored and (b) the number of columns that the data occupy.

**5. SAS<sup>®</sup> data file information.** This block indicates format name, variable type, length and informat of the data in the SAS<sup>®</sup> data file. The last block indicates the informat appropriate for reading the data from the OS data file.

**6. Counts of item value responses.** This column indicates the number of sample members who fall into the category corresponding to each value for the variable. The count provided for each variable value should correspond exactly to those that analysts would obtain when running unweighted frequencies on all 30,939 records in the accompanying database. Before running complex statistical analyses, analysts are encouraged to re-create these frequency tables. Re-creating the counts minimally ensures that the data are being correctly read by the analysts' computers and programs.

**7. Respondent percentages for each value.** This column indicates the percentage of sample members who marked each variable value. The percentages are calculated by dividing the row value in the "FREQ" column by the total listed at the bottom of the "FREQ" column. The percentages provided for each variable value should correspond exactly to those that analysts would obtain when running unweighted frequencies on all 30,939 records in the accompanying database.

**8. Response OS values.** This column presents the OS (ASCII) code for the actual or re-coded response values for each survey item. Further details on the values in this column are found in either the annotated survey form or in Appendix D. For example, all negative values are found in Appendix D.

**9. Response SAS® values.** This column presents the SAS® code for the actual or re-coded response values for each survey item. Further details on the values in this column are found in either the annotated survey form or in Appendix D. Negative values are found in Appendix D.

**10. Explanation of the item value codes.** This column presents brief verbal explanations of the OS and SAS® coding for each survey item. If the coded information corresponds to survey response alternatives, the text in the table is the verbatim response from the survey instrument. More detailed explanations are found in either the annotated survey form or in Appendix D.

**11. Total of response frequencies and percents.** The number appearing at the bottom of the “FREQ” column is the total number of sample members in the basic survey file. This number is the same for every table in this codebook. That is, every sample member in the database is accounted for on every variable even if the variable indicates only that the information was missing for that sample member. The number appearing at the bottom of the “PERCENT” column is typically 100.0. Rounding error, however, occasionally causes the total percentage to be slightly above or below 100.0.

**12. Messages to analysts.** The messages alert analysts to situations specific to a variable including (a) rounding errors resulting in a total percentage other than 100 percent; (b) the variable having values that are “too numerous to list;” (c) extraction of the variable from another specified database; (d) creation of the variable from two or more variables specified in the message; and (e) further clarification of the survey item corresponding to the variable.

**13. Codebook page number.** This is the Appendix G page number corresponding to a specific variable. Appendix F identifies the page number in Appendix G where the variable can be found.

## ELIGIBILITY

### 1. In what Service were you on active duty on February 28, 2005?

- ☐ Army
- ☐ Navy
- ☐ Marine Corps
- ☐ Air Force
- ☐ None, you were separated or retired

\*\*\*\*\* Page Break \*\*\*\*\*

## BACKGROUND INFORMATION

### 2. Are you...?

- ☐ Male
- ☐ Female

\*\*\*\*\* Page Break \*\*\*\*\*

## BACKGROUND INFORMATION

### 3. What is your current paygrade? *Mark one.*

## BACKGROUND INFORMATION

### 4. What is your marital status?

- ☐ Married
- ☐ Separated
- ☐ Divorced
- ☐ Widowed
- ☐ Never married

\*\*\*\*\* Page Break \*\*\*\*\*

## BACKGROUND INFORMATION

**5. How many years have you been in a relationship with your current significant other (that is, girlfriend or boyfriend)?**

- ☐ Does not apply; I do not have a girlfriend/boyfriend
- ☐ Less than 1 year
- ☐ 1 year to less than 6 years
- ☐ 6 years to less than 10 years
- ☐ 10 years or more

\*\*\*\*\* Page Break \*\*\*\*\*

## **BACKGROUND INFORMATION**

**In the following section, you will be asked question(s) about your spouse's employment status in enough detail to ensure comparability with national employment surveys.**

**6. Is your spouse currently serving on active duty (not a member of the National Guard or Reserve)?**

- ☐ Yes
- ☐ No

\*\*\*\*\* Page Break \*\*\*\*\*

## **BACKGROUND INFORMATION**

**7. Is your spouse currently serving as a member of the National Guard or Reserve in a full-time active duty program (AGR, TAR, AR)?**

- ☐ Yes
- ☐ No

\*\*\*\*\* Page Break \*\*\*\*\*

## **BACKGROUND INFORMATION**

**8. Is your spouse currently serving as a member of another type of National Guard or Reserve unit (e.g., drilling unit, IMA, IRR, military technician)?**

- ☐ Yes
- ☐ No

\*\*\*\*\* Page Break \*\*\*\*\*

## **BACKGROUND INFORMATION**

**9. Last week, did your spouse do any work for pay or profit? Mark "Yes" even if your spouse worked only one hour, or helped without pay in a family business or farm for 15 hours or more.**

- ☐ Yes
- ☐ No

\*\*\*\*\* Page Break \*\*\*\*\*

### BACKGROUND INFORMATION

**10. Last week, was your spouse temporarily absent from a job or business?**

- ☐ Yes, on vacation, temporary illness, labor dispute, etc.
- ☐ No

\*\*\*\*\* Page Break \*\*\*\*\*

### BACKGROUND INFORMATION

**11. Has your spouse been looking for work during the last 4 weeks?**

- ☐ Yes
- ☐ No

\*\*\*\*\* Page Break \*\*\*\*\*

### BACKGROUND INFORMATION

**12. Last week, could your spouse have started a job if offered one, or returned to work if recalled?**

- ☐ Yes, could have gone to work
- ☐ No, because of his/her temporary illness
- ☐ No, because of all other reasons (in school, etc.)

\*\*\*\*\* Page Break \*\*\*\*\*

### BACKGROUND INFORMATION

**13. What is the highest degree or level of school that you have completed? Mark the one answer that describes the highest grade or degree that you have completed.**

- ☐ 12 years or less of school (no diploma)
- ☐ High school graduate---high school diploma or equivalent (e.g., GED)
- ☐ Some college credit, but less than 1 year
- ☐ 1 or more years of college, no degree
- ☐ Associate's degree (e.g., AA, AS)
- ☐ Bachelor's degree (e.g., BA, AB, BS)
- ☐ Master's, doctoral, or professional school degree (e.g., MA, MS, MEng, MBA, MSW, PhD, MD,

JD, DVM)

\*\*\*\*\* Page Break \*\*\*\*\*

### BACKGROUND INFORMATION

**For the next questions, the definition of "child or children" or "other legal dependents" includes anyone in your family, except your spouse, who has or is eligible to have a Uniformed Services identification card (military ID card) or is eligible for military health care benefits and is enrolled in the Defense Enrollment Eligibility Reporting System (DEERS).**

**14. Do you have a child, children, or other legal dependents based on the definition above?**

- ☐ Yes  
☐ No

\*\*\*\*\* Page Break \*\*\*\*\*

### BACKGROUND INFORMATION

**15. How many children or other legal dependents do you have in each age group? *Mark one answer in each row. To indicate none, select "0". To indicate nine or more, select "9".***

## SATISFACTION AND RETENTION INTENTION

### 20. Taking all things into consideration, how satisfied are you, in general, with each of the following aspects of being in the military?

	Very satisfied	Satisfied	Neither satisfied nor dissatisfied	Dissatisfied	Very dissatisfied
a. Your total compensation (i.e., base pay, allowances, and bonuses)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. The type of work you do in your military job	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
c. Your opportunities for promotion	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
d. The quality of your coworkers	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
e. The quality of your supervisor	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

\*\*\*\*\* Page Break \*\*\*\*\*

## SATISFACTION AND RETENTION INTENTION

### 21. Overall, how satisfied are you with the military way of life?

- ☐ Very satisfied
- ☐ Satisfied
- ☐ Neither satisfied nor dissatisfied
- ☐ Dissatisfied
- ☐ Very dissatisfied

\*\*\*\*\* Page Break \*\*\*\*\*

## SATISFACTION AND RETENTION INTENTION

**22. How many years of active-duty service have you completed (including enlisted, warrant officer, and commissioned officer time)? To indicate less than 1 year, enter "0". To indicate 35 years or more, enter "35".**

\*\*\*\*\* Page Break \*\*\*\*\*

## SATISFACTION AND RETENTION INTENTION

**23. Suppose that you have to decide whether to stay on active duty. Assuming you could stay, how likely is it that you would choose to do so?**

- ☐ Very likely
- ☐ Likely
- ☐ Neither likely nor unlikely
- ☐ Unlikely
- ☐ Very unlikely

\*\*\*\*\* Page Break \*\*\*\*\*

## SATISFACTION AND RETENTION INTENTION

**24. Does your spouse or significant other think you should stay on or leave active duty?**

- ☐ Strongly favors staying
- ☐ Somewhat favors staying
- ☐ Has no opinion one way or the other
- ☐ Somewhat favors leaving
- ☐ Strongly favors leaving

\*\*\*\*\* Page Break \*\*\*\*\*

## SATISFACTION AND RETENTION INTENTION

**25. Does your family think you should stay on or leave active duty?**

- ☐ Strongly favors staying
- ☐ Somewhat favors staying
- ☐ Has no opinion one way or the other
- ☐ Somewhat favors leaving
- ☐ Strongly favors leaving

## SAFETY

**107. How much do you agree or disagree with each of the following statements?**

	<b>Strongly agree</b>	<b>Agree</b>	<b>Neither agree nor disagree</b>	<b>Disagree</b>	<b>Strongly disagree</b>
a. It is common for personnel to take part in identifying and eliminating worksite hazards.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
b. There is frequent contact and communication between personnel	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

- and leadership.
- c. Safety takes a back seat to performing duties. ☐ ☐ ☐ ☐ ☐
- d. Personnel often get involved in developing or revising safety practices. ☐ ☐ ☐ ☐ ☐
- e. My supervisor maintains a high job safety standard. ☐ ☐ ☐ ☐ ☐

**(Continued) How much do you agree or disagree with each of the following statements?**

- |  | <b>Strongly agree</b> | <b>Agree</b>          | <b>Neither agree nor disagree</b> | <b>Disagree</b>       | <b>Strongly disagree</b> |
|--|-----------------------|-----------------------|-----------------------------------|-----------------------|--------------------------|
| f. Detailed inspections of the base and facilities are made at regular, frequent intervals.        | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>             | <input type="radio"/> | <input type="radio"/>    |
| g. Leadership's views on the importance of safety are seldom stressed in personnel communications. | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>             | <input type="radio"/> | <input type="radio"/>    |
| h. Safety meetings are held less often than they should be.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>             | <input type="radio"/> | <input type="radio"/>    |
| i. Good teamwork exists within our unit.   | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>             | <input type="radio"/> | <input type="radio"/>    |
| j. Leadership shows that it cares about personnel safety.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>             | <input type="radio"/> | <input type="radio"/>    |

**(Continued) How much do you agree or disagree with each of the following statements?**

- |  | <b>Strongly agree</b> | <b>Agree</b>          | <b>Neither agree nor disagree</b> | <b>Disagree</b>       | <b>Strongly disagree</b> |
|--|-----------------------|-----------------------|-----------------------------------|-----------------------|--------------------------|
| k. I can protect myself and other personnel through my actions while on duty.                            | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>             | <input type="radio"/> | <input type="radio"/>    |
| l. My supervisor's behavior often goes against safety procedures.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>             | <input type="radio"/> | <input type="radio"/>    |
| m. Designated personnel are well trained in emergency-response related procedures, including evacuation. | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>             | <input type="radio"/> | <input type="radio"/>    |
| n. Leadership has published a written policy that expresses their attitude about personnel safety.       | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>             | <input type="radio"/> | <input type="radio"/>    |
| o. Near miss accidents/incidents are thoroughly investigated.  | <input type="radio"/> | <input type="radio"/> | <input type="radio"/>             | <input type="radio"/> | <input type="radio"/>    |

**(Continued) How much do you agree or disagree with each of the following statements?**

<b>Strongly</b>	<b>Neither agree nor</b>	<b>Strongly</b>
-----------------	--------------------------	-----------------

	agree	Agree	disagree	Disagree	disagree
p. Leadership does no more than the law requires to keep personnel safe.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
q. I understand the safety regulations relating to my duties.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
r. My supervisor enforces safety procedures.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
s. Standardized precautions are used by personnel who deal with hazardous materials.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
t. Leadership has provided adequate personnel to manage and support its safety program.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

**(Continued) How much do you agree or disagree with each of the following statements?**

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
u. Awards and recognition programs used in this unit are not good at promoting safe behavior.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
v. Job performance standards are higher for professional duties than for safety.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
w. My supervisor understands the safety problems I face.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
x. Personnel follow a regular lockout/tagout procedure.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
y. Safety training is part of every new personnel orientation.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

**(Continued) How much do you agree or disagree with each of the following statements?**

	Strongly agree	Agree	Neither agree nor disagree	Disagree	Strongly disagree
z. I believe leadership is sincere in its efforts to ensure personnel safety.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
aa. My supervisor seldom acts on personnel safety suggestions.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
ab. Emergency response-related procedures are almost never tested to make sure they are working.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
ac. The work of the command safety officer improves safety conditions in my unit.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
ad. Leadership sets a positive safety example through their words and actions.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

**(Continued) How much do you agree or disagree with each of the following statements?**

	<b>Strongly agree</b>	<b>Agree</b>	<b>Neither agree nor disagree</b>	<b>Disagree</b>	<b>Strongly disagree</b>
ae. My supervisor has successfully fit safety into performance of duties.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
af. The system of preventive maintenance for facilities, tools, and machinery operates poorly.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
ag. Leadership regularly participates in safety programs and committee activities.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
ah. The safety officer(s) has high status in this unit.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
ai. Hazards that are not fixed right away by supervisors are often ignored.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

**(Continued) How much do you agree or disagree with each of the following statements?**

	<b>Strongly agree</b>	<b>Agree</b>	<b>Neither agree nor disagree</b>	<b>Disagree</b>	<b>Strongly disagree</b>
aj. Personnel take part when accident or incident investigations occur.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
ak. The training provided through my supervisor helps me do my duties safely.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
al. It is well known that leadership ignores a person's safety performance when determining promotions.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
am. The safety officer is readily available to provide advice and assistance.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
an. Personnel are afraid to report safety problems to their supervisors.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

**(Continued) How much do you agree or disagree with each of the following statements?**

	<b>Strongly agree</b>	<b>Agree</b>	<b>Neither agree nor disagree</b>	<b>Disagree</b>	<b>Strongly disagree</b>
ao. My supervisor always investigates safety incidents.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
ap. Ventilation, lighting, noise, and other environmental conditions are kept at good levels.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
aq. A lot of personnel don't use the personal protective equipment necessary to do their jobs safely.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

- ar. Leadership insists that supervisors think about safety when doing their jobs. ☐ ☐ ☐ ☐ ☐
- as. Leadership annually sets safety goals for which all personnel are held accountable. ☐ ☐ ☐ ☐ ☐

**(Continued) How much do you agree or disagree with each of the following statements?**

	<b>Strongly agree</b>	<b>Agree</b>	<b>Neither agree nor disagree</b>	<b>Disagree</b>	<b>Strongly disagree</b>
at. Personnel rarely take part in the development of safety requirements for their jobs.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
au. The increased stress levels and operations tempo in the work place are causing increased accidents off duty.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
av. Most off-duty vehicular accidents are due to bad decisions regarding alcohol or speed, not lack of safety training.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
aw. It is not the Department of Defense's responsibility to be concerned about off-duty safety for me and my family.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
ax. My supervisor is concerned for my welfare and safety off duty as well as on duty.	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Dear Private Sample:

You have been selected to participate in the *March 2005 Status of Forces Survey of Active-Duty Members*. The survey will be available at the Web site below around February 28, 2005. The survey will ask for your attitudes and opinions on a variety of topics related to your military service. This information will assist us in the development of policies and programs that will improve the workplace for all Military Service members.

I urge you to share your perspective on these important issues. This is your opportunity to impact directly the formulation of military personnel policies. These surveys are *Official Business* and can be completed at your duty station using government equipment. If you choose, you can also complete the survey at home or elsewhere. I assure you that your responses will be kept confidential. No information about you as an individual will ever be released.

Please take the time today to provide us with an e-mail address for notifications about the survey by going to our Web site: <http://dodsurvey.osd.mil> At the Web site, you will be asked to enter your **Ticket Number**. Your number is UXXXXXXX

If your address on this letter is incorrect, please let us know at the Web site above. If you cannot access the Web site or you have questions pertaining to the survey, there are three other ways to contact us: by calling our Survey Processing Center at 1-800-881-5307, e-mailing [ADSurvey@osd.pentagon.mil](mailto:ADSurvey@osd.pentagon.mil), or sending a facsimile to 1-763-268-3011.

Thank you for your time and assistance in this very important effort. For more information on the Status of Forces Survey Program, please see the enclosed brochure.

Sincerely,

David S. C. Chu  
Under Secretary of Defense  
(Personnel and Readiness)

**P.S. for families:** We need to hear from all members, even those deployed or away for other reasons. If possible, please forward this message to your military family member.

Dear Sergeant Sample:

We recently mailed you a letter asking you to participate in the *March 2005 Status of Forces Survey of Active-Duty Members*. The survey will be available at the Web site below about February 28, 2005. To take the survey, you need to log onto the following Web site:

<http://dodsurvey.osd.mil>

To access the survey, you will need to enter the following **Ticket Number: UXXXXXXX**

The survey should take 30 minutes or less to complete. Please keep in mind, these surveys are *Official Business* and that they can be completed at your duty station using government equipment. You can also complete the survey at home or elsewhere.

Your participation in this survey effort is important. You were scientifically selected, as part of a small group of people, to participate in this survey. Therefore, your answers will represent the views of many others like yourself. This is your opportunity to inform policy officials of your opinions on various issues related to your compensation and family life. Be assured your responses will be kept completely confidential. Only group statistics will be compiled and reported. No information about you as an individual will be used.

If you cannot access the Web or experience any other problem with the survey, please e-mail [ADSurvey@osd.pentagon.mil](mailto:ADSurvey@osd.pentagon.mil) or leave a message anytime, toll-free, at 1-800-881-5307.

Your time and cooperation in this very important effort are greatly appreciated. The enclosed brochure provides additional information on this effort.

Sincerely,

David S. C. Chu  
Under Secretary of Defense  
(Personnel and Readiness)

**P.S. for families:** We need to hear from all members, even those deployed or away for other reasons. If possible, please forward this message to your military family member.

Dear Seaman Sample:

Recently you were asked to participate in the *March 2005 Status of Forces Survey of Active-Duty Members*. If you have already completed the survey, I want to thank you for taking the time to do so.

If you have not had a chance to complete the survey or were thinking about not participating, I would like to ask you to reconsider. Your participation is crucial and I appreciate your taking your time to complete the survey—this really is your chance to express your views on personnel issues.

If you have not done so already, please take the survey by logging onto the following Web site:

<http://dodsurvey.osd.mil>

At the Web site, you will need to enter your **Ticket Number: UXXXXXXX**

If you cannot take the survey now, please ensure you take the survey soon. The survey should take 30 minutes or less to complete. The survey will only be available on the Web site for a couple more weeks, so please make every effort to complete the survey soon. Since these surveys are *Official Business*, you can use the computer equipment at your duty station to complete the survey. If you have any questions, please e-mail [ADSurvey@osd.pentagon.mil](mailto:ADSurvey@osd.pentagon.mil) or leave a message anytime, toll-free, at 1-800-881-5307.

Your time and cooperation in this very important effort are greatly appreciated.

Sincerely,

David S. C. Chu  
Under Secretary of Defense  
(Personnel and Readiness)

**P.S. for families:** We need to hear from all members, even those deployed or away for other reasons. If possible, please forward this message to your military family member.

Dear Colonel Sample:

If you have already completed the *March 2005 Status of Forces Survey of Active-Duty Members*, I want to thank you for taking the time to do so. If you have not completed the survey, I want to ask you one last time to do so.

I cannot emphasize enough how important surveys are to the Department. Surveys are the only systematic way we have for finding out how you and your fellow Service members feel about important topics such as compensation and family life. I want to assure you that the time you take to complete surveys is not wasted—this really is your chance to be heard. My staff and I are personally briefed on the results of these surveys. We use this information to shape policies and programs that directly affect you.

If you have not done so already, please take the survey by logging onto the following Web site:

<http://dodsurvey.osd.mil>

To enter the Web site, you will need the following **Ticket Number: UXXXXXXX**

Please ensure you take the survey very soon. The survey will only be available on the Web site until April 4, 2005. Since these surveys are *Official Business*, you can use the computer equipment at your duty station to complete the survey.

If you have any questions, please e-mail [ADSurvey@osd.pentagon.mil](mailto:ADSurvey@osd.pentagon.mil) or leave a message anytime, toll-free, at 1-800-881-5307.

Your time and cooperation in this important effort are greatly appreciated.

Sincerely,

David S. C. Chu  
Under Secretary of Defense  
(Personnel and Readiness)

**P.S. for families:** We need to hear from all members, even those deployed or away for other reasons. If possible, please forward this message to your military family member.

April 1, 2005

Dear SGT Sample,

**MARCH 2005 STATUS OF FORCES SURVEY OF ACTIVE-DUTY MEMBERS**

Your Ticket Number:

For those who have completed the March 2005 Status of Forces Survey of Active-Duty Members, thank you very much. If you have not, there are only 3 more days remaining before we will have to close the Web site. Please take the time before April 4, 2005 to take the survey.

The Web site for the survey is: <http://dodsurvey.osd.mil> Simply click on this address to go directly to the Web site. If this does not work, "copy and paste" this address into the Web address box of your Internet browser. Once you enter the Web site, you will need to enter the following Ticket Number:

If you have partially completed the survey, but have not clicked the "Submit Button," please log onto the Web site, complete as many items as you can, and submit the survey to us. After April 4, 2005, we will consider whatever items you have completed at that point to be your intended response.

If you have any questions or concerns, you may reply to this message, or send an e-mail to [ADSurvey@osd.pentagon.mil](mailto:ADSurvey@osd.pentagon.mil) or leave a message anytime, toll-free, at 1-800-881-5307.

## **WILL MY ANSWERS BE KEPT PRIVATE?**

- Your privacy will be safeguarded in accordance with the Privacy Act of 1974 (Public Law 93-579).
- Only group statistics will be reported. Individual data will not be reported.

### **PRIVACY ACT STATEMENT**

In accordance with the Privacy Act, this notice informs you of the purpose of these surveys and how the findings of these surveys will be used. Please read it carefully.

**AUTHORITY:** 10 United States Code, Sections 136, 1782, and 2358.

**PRINCIPAL PURPOSE:** Information collected in these surveys will be used to report attitudes and perceptions about personnel programs and policies. This information will assist in the formulation of policies which may be needed to improve the working environment. Reports will be provided to the Offices of the Secretary of Defense and the Secretary of Homeland Security, each Military Department, and the Joint Chiefs of Staff. Findings will be used in reports and testimony provided to Congress. Some findings may be published by the Defense Manpower Data Center (DMDC) or in professional journals, or presented at conferences, symposia, and scientific meetings. In no case will the data be reported or used for identifiable individual(s).

**ROUTINE USES:** None.

**DISCLOSURE:** Providing information on this survey is voluntary. There is no penalty if you choose not to respond. However, maximum participation is encouraged so that the data will be complete and representative. Your survey responses will be treated as confidential. Identifying information will be used only by persons engaged in, and for purposes of, the survey research.

## *HRSAP Surveys*

**DMDC**

*Human Resources  
Strategic Assessment  
Program (HRSAP)*

***Status of Forces  
Surveys***

Office of the Under Secretary of Defense  
(Personnel & Readiness)  
Defense Manpower Data Center

1600 Wilson Blvd., Suite 400  
Arlington, VA 22209-2593  
[www.dmdc.osd.mil](http://www.dmdc.osd.mil)

## WHAT ARE HUMAN RESOURCES STRATEGIC ASSESSMENT PROGRAM (HRSAP) SURVEYS?

- HRSAP is a Department of Defense (DoD) personnel survey program that features Web-based and paper surveys sponsored by the Under Secretary of Defense for Personnel and Readiness.
- The Status of Forces Surveys enable the DoD, on a regular basis, to quickly and accurately gauge the attitudes and opinions of the entire DoD community - active-duty and Reserve component members, and DoD civilians - on the full range of personnel issues.
- The Defense Manpower Data Center (DMDC) is tasked with administering those surveys.

## HOW DO I PARTICIPATE?

- You'll need a Ticket Number each time you access the survey Web site.
- You will find a tear-out card with a ticket number below. Please register on-line now, and you will be contacted via e-mail when the survey is ready to take.
- This tear-out card was designed to fit in your wallet. Please remove and save for future use.

## HOW DID YOU PICK ME?

- We use well-established, scientific procedures to select a sample that represents the Defense community.
- This sampling procedure sets up clusters of people based on combinations of demographic characteristics (e.g., location, gender).
- You were selected at random from one of these clusters of people.

## WHY SHOULD I PARTICIPATE?

- This is your chance to be heard on issues that directly affect you.
- Some examples of topics include: quality of life, retention, retirement, and satisfaction.
- Your answers on a survey *make a difference*. For example, results from previous surveys have played an important role in deliberations on pay rate adjustments, cost of living and housing allowances, and morale and retention programs.

## WHY USE THE WEB? WHAT IF I DON'T HAVE A COMPUTER OR ACCESS TO THE INTERNET?

- Web administration enables us to get survey results to senior Defense officials faster.
- These surveys are *Official Business*; therefore, they can be completed at your duty station using government equipment.
- If you don't have a computer or Internet at work/home, many installation and public libraries, as well as education centers, have computers with Internet access that you could use.

## WILL I EVER SEE THE RESULTS OF THE SURVEYS?

- Briefings and reports on results from these surveys will be posted on the following Web site: <http://www.dmdc.osd.mil/surveys/>

## WHAT DOES DMDC DO?

- DMDC maintains the largest archive of personnel, manpower, training, and financial data in DoD. These data are used to support the management information needs of the Office of the Secretary of Defense and many offices both within and outside of the Department.
- DMDC operates major programs that affect active duty and Reserve component military members and their families, and DoD civilian employees. Programs include conducting personnel surveys; helping ensure access to military medical facilities; managing the military and civilian ID card issuance program; and assisting with transitions back into the private sector.

## **Appendix D**

### **Coding Scheme**

## **APPENDIX D: Coding Scheme for the March 2005 Status of Forces Survey of Active Duty Members**

The guiding premise of coding this and other DMDC surveys is that the analysts creating the dataset will not be the only ones analyzing the data. DMDC rarely collects data only for immediate use or to answer one question. Different people, both at DMDC and other organizations (government, academic, and private-sector), analyze DMDC datasets repeatedly over time. Every care is taken in organizing and documenting DMDC surveys so secondary analysts can be reasonably certain they understand both how the data are coded and the limitations of the data. This describes (a) variable naming conventions, (b) how data are captured from the survey instrument, and (c) the edit process to create survey response variables for the analysis file.

### **Variable Naming**

In responding to a customer's request for information, DMDC often uses multiple data sources. Information on a particular topic could be obtained from different surveys or from a survey that has been repeated over a number of years. For example, a customer might be interested in organizational commitment items included in a survey of active duty members in 1999 and in an exit survey in 2000. Conventions discussed below are being used as a means for facilitating such analyses.

#### *Non-survey-derived Variables*

Variable names for non-survey-derived variables tend to use acronyms that aid in remembering the meanings of the variables. Two important conventions were used in naming variables.

A variable name from DMDC record files was used only if the data, values, and value labels were identical to those from an official DMDC personnel data file. When data were added to an analysis file unchanged from record data, the same variable name, values, and value labels were used. For example, SERVICE is a field in the ADMF and RCCPDS that indicates the member's service. Since the variable in the survey data file is identical to that in the record data from the month that the sample was drawn, the same variable name and labels were used. In contrast, the variable CSERVICE has slightly different values and value labels, and consequently was given a variable name that is not used in the official records so as not to confuse analysts who work routinely with record data.

Beginning a variable name with "X" indicates it is a special crossing (marginal) variable for key analyses. "X variables" typically involve using record data to impute values for missing data in survey items. X variables may also require collapsing or recoding to missing in order to preserve confidentiality of respondents. (See I for the programming that was used to compute X variables.)

### *Survey-derived Variables*

Identical demographic items are used across many DMDC surveys. Each time these items are used, common variable names and values are used. The variable names for this group of demographic items start with “SR” (mnemonic for self reported). The following items in this survey fall into this category: SRSEX (for gender), SRED (for education), SRRACEA-E (for race) and SRHISP (for Hispanic ethnicity). COMMENT (for a flag indicating if a comment has been entered) and SRDATE (for the date the survey was completed) are other standard variables across DMDC surveys.

The basic naming conventions are implemented as follows for March 2005 Status of Forces Survey of Active Duty Members:

- The first and second positions are “AH” for the basic variables for items appearing in March 2005 SOFS.
- The third, fourth, and fifth characters after the AH are item numbers in the survey from 001 through 128.
- Letters following the numbers for multi-part items usually represent the sub-item. The exceptions, skip pattern flags (ending in “SK”) and specify flags (ending in a “SP”), are explained later in the section titled, Standard Flag Variables.

### *Value Coding and Formats*

Datasets were prepared as SAS<sup>1</sup> system files. An OS or flat file version of the public release file was then prepared from the SAS system file. This section describes how values were treated in creating the SAS system files and notes any differences in the flat file.

In the SAS system files, variables were declared as numeric unless they contained true alphabetic characters. Although numeric variables can take more storage space, many statistical and logical operations can be done only with variables that are declared as numeric. Values for alphabetic variables were input with \$CHARww. formats to preserve leading, embedded, and trailing blanks.

### *Raw-Data Encoding Process*

When a respondent completes an online survey, data are stored in an indexed file on the Web (data) server. Prior to providing each dataset to DMDC, the operations contractor copies the indexed file to their internal network. The data are then converted to a sequential format, and the validate program reads and loads the data to the dataset.

Web data are matched back to sample members by matching the ticket number to INRECNO and subsequently to the respondent. The “other specify” and open-ended

---

<sup>1</sup> SAS is a trademark of the SAS Institute, Inc.

comments are collected in a comment file and linked to the Web survey data by ticket number. Because the Web survey does not allow multiple or lightly marked responses, there is no need for editing the data. However, all text entries are cleaned and edited to remove identifying information and expletives.

Data cleaning can be thought of as occurring in four coding steps. In practice, these steps may not be strictly linear, nor neatly match the processing steps discussed above. However, they are a convenient framework to understand the meaning of the codes.

1. Each response is coded with one of two types of standard codes: valid response option value (see Coding Annotation of the survey form in C) or no response (-9).
1. Specify flag variables are created, and codes are assigned to indicate if respondents typed in responses correctly where text boxes were used.
2. Skip flag variables are created, and codes are assigned to indicate if respondents completed the skip pattern correctly. Special codes for valid skips are assigned to variables within skip patterns using a “forward coding” process.
3. Text code variables are created, and codes are assigned based on the content coding of the text entries.

In the coding sequence, coding in the third and later steps builds on prior steps and usually involves values in multiple items to resolve edits.

The next sections discuss the assignment of missing value codes, the special treatment of data variables, and the editing of skip patterns during steps 3 and 4.

### *Missing Data Codes*

The instructions used to assign missing data codes and other special codes are shown in three tables. In these tables, the value labels associated with each assigned code are shown in italicized text. These are the SAS format labels used in the SAS dataset.

- Table D-1 contains basic SAS and flat file missing data codes.
- Table D-2 contains SAS and flat file missing data codes for dates.
- Table D-3 provides detailed coding notes on items involving skip patterns, text boxes or other non-obvious coding.

The codes presented in Table D-1 are general missing data codes that have been adopted in recent years for use on DMDC surveys. (Standards for date variables are in Table D-2.) Both tables have separate columns for values used for SAS system files and flat files. The biggest difference between the flat files and SAS system files is in the

treatment of missing values. The flat file codes differ from the SAS codes because SAS implements special missing codes and formats that may not be compatible with other statistical analysis software such as SPSS<sup>2</sup>.

**Table D-1.**  
**Basic SAS® and Flat Missing Data Codes**

SAS® File			Flat File	
Numeric	Alpha	Numeric	Alpha	Description
.	.	-9	.	<i>No response or missing skip</i>
.O	.O	-7	.O	<i>Out-of-range</i>
.N	.N	-6	.N	<i>Not applicable or valid skip</i>
.F	.F	-5	.F	<i>Variable not on survey form.</i> This value is reserved for multiple-form surveys
.I	.I	-4	.I	<i>Incomplete grid error</i>
.G	.G	-3	.G	<i>No match on official records.</i> Only used for master file, sampling, and weighting variables for surveys that cannot be matched back to the sample file. Typically used in files of duplicate returns; these returns are not stored in the main or basic survey data files.
.B	.B	-1	.B	<i>Blank/no survey.</i> Filler values for survey variables when either a blank survey is returned or no survey is returned. Control system variables retain assigned values.
99	DK	99	DK	<i>Don't know or Not sure*</i>

\*Use of "Don't know" or "Not sure" as a response is not missing data. It is, however, given special treatment because it lacks precision and is *sometimes* excluded when calculating percentages.

<sup>2</sup> SPSS is a trademark of SPSS Inc.

**Table D-2.**  
**SAS® and Flat File Missing Data Codes for Dates**

SAS® File		Flat File		
Re-coded Value	Value read from input	YYYYMMDDMMYYYY		Description
.	-54908	18090901	SEP1809	<i>No response (invalid skip)</i>
.O	-55701	18070701	JUL1807	<i>Out-of-range error</i>
.N	-56096	18060601	JUN1806	<i>Not applicable (valid skip)</i>
.I	-56887	18040401	APR1804	<i>Incomplete grid error</i>
.B	-58073	18010101	JAN1801	<i>Blank/no survey.</i> Filler value for survey variables when either a blank survey is returned or no survey is returned. Control system variables retain assigned values.

*Note:* This conversion has already been done in DMDC SAS® files.

SAS can represent up to 27 missing data values for numeric variables as either a period or a period-letter combination. While SAS can read alpha characters representing missing data in a raw data field declared to be numeric, other programs such as SPSS do not accept these characters in numeric fields. Missing numeric data are represented in the flat files by negative numbers that can be declared as missing values. For example, a multiple response error in flat files is coded as a “-8”, which can be declared as a missing value when the data are input in SPSS—in the SAS file, the value “.A” is used to represent a multiple response error.

Data requirements of SUDAAN<sup>3</sup> were also considered in coding. Primarily this means avoiding in coding the use of a zero, which has a special use for certain procedures in SUDAAN, for a variable that will be used as an independent variable.

Many types of missing data are common to surveys and are self-explanatory. In general, missing data are coded as “-9” (SAS: .) when respondents skip the item invalidly. Incomplete or in inappropriate responses in text boxes that could not be resolved to numeric are coded as “-4” (SAS: .I). Out-of-range responses in grids (e.g., number of days or weeks in a year larger than 365 or 52, respectively) are coded as “-7” (SAS: .O).

For a single item that contains a response alternative of “Not applicable,” or multiple items that can be affected by a skip pattern, or when item(s) have multiple ways to be not applicable, a missing data code of “-6” (SAS: .N) is typically used.

Multiple survey forms or modes (e.g., paper and web) are sometimes used in a single effort, and the data from all the related forms may be combined into a single

<sup>3</sup> SUDAAN is a trademark of the Research Triangle Institute.

dataset for analysis. Questions may appear in one form or mode but not in another. In a combined dataset, a code of “-5” (SAS: .F) indicates missing data for variables not on the form completed by a respondent.

Records are included in the files for sampled members regardless of whether or not they returned a survey. If a member did not return a survey or returned a blank survey, every survey variable is assigned a value of “-1” (SAS: .B).

### Standard Flag Variables

This survey employs two standard flag variables: specify flags and skip flags. Specify and skip flags are created during the second and third edit steps.

Skip pattern flags indicate whether one or more questions were or were not to be asked of respondents. For example, if respondents to this survey indicate on Question 4 (SRMARST) that they were not married or separated, then respondents were not to see Question 6. PRSEMP01SK is a flag variable indicating if Question 6 (PRSEMP01) was answered consistently with the skip direction. Skip flags are useful for evaluating the effectiveness of the skip pattern and for screening out ambiguous response patterns during analysis.

Specify flags are used to verify whether additional information was or was not to be gathered on a particular question. For example, SRDULSP is a flag variable indicating when respondents had a permanent duty station different than any of those listed in question 18 or were “unsure”. The specify flag indicates that the specify box, on Question 18, item c, was enabled to allow respondents to type in text. Specify flags are useful for evaluating the completeness of the option categories; for example, answering “yes” for the category “other reason”.

### *Special Codes for Skip Patterns*

Coding steps 3 and 4 involve editing data to resolve discrepancies in skip patterns. Skip flags are created in step 3. Table D-1 introduced the general outline of the skip flags, but the specific flags for each skip pattern are specified in Table D-3.<sup>4</sup> After the creation of all the skip flags in step 3, variables within the skip patterns are forward coded in step 4 to make them consistent with the variables that start the skip patterns. To preserve all data, the variables within skip patterns are first copied to a set of confidential variables. The naming convention for these “raw” variables is to end the name with “U” for Unedited. Table D-3 specifies how to assign the special values, to variables within the skip patterns. While Table D-3 is organized to show all the edits for a skip pattern, all step 3 edits are made prior to making any step 4 edits. The remainder of this section describes the logic behind coding of skip patterns.

While an analyst can ignore discrepancies between a respondent’s answer on an item containing a conditional direction to skip items and answers to those items, it is generally better to resolve the discrepancies. Two ways of resolving the discrepancies

---

<sup>4</sup> Table D-3 also provides special coding notes for other non-obvious codings.

can be termed backward and forward coding. Backward coding involves correcting the discrepancy by editing back from the skip pattern items to make the initial question conform. Forward coding involves correcting the discrepancy by editing forward from the initial question to make the skip pattern items conform. Data for this survey are forward coded with data on the starting question accepted as marked and data for the items within the skip pattern edited to be consistent with the starting question.

If a starting item is marked in such a way that the respondent should skip, items within the skip pattern have the not applicable value (.N) assigned regardless of what the respondent marked on the items within the skip pattern. These values differentiate items with data missing because the item should have been skipped from items where data are missing because the respondent should have answered them but did not.

Table D-1:  
Special Coding Notes

---

Note Coding instructions and codebook specifications

1. **SRSVC1. Codebook page for SRSVC1 should note:**

"Respondents indicating separated or retired (SRSVC1=5) are considered ineligible for survey."

2. **MARDISCK, MARDISCU. The following explains how to create the flag variable - the codebook page should contain this information:**

"**MARDISCK** is an indicator of whether **MARDISC** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If ((SRMARST = 3 OR SRMARST = 4) OR SRMARST = 5) then **MARDISCK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**MARDISCU** = **MARDISC**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If MARDISCK = 1 then do;

MARDISC = .N;

end;

.N = (Not Applicable)

3. **PRSEMP01SK, PRSEMP01U. The following explains how to create the flag variable -- the codebook page should contain this information:**

"**PRSEMP01SK** is an indicator of whether **PRSEMP01** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (SRMARST = 1 OR SRMARST = 2) then **PRSEMP01SK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**PRSEMP01U** = **PRSEMP01**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If PRSEMP01SK = 1 then do;

PRSEMP01 = .N;

end;

.N = (Not Applicable)

4. **PRSEMP02SK, PRSEMP02U.** The following explains how to create the flag variable -- the codebook page should contain this information:

"**PRSEMP02SK** is an indicator of whether **PRSEMP02** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If ((SRMARST = 1 OR SRMARST = 2) AND PRSEMP01 = 1) then **PRSEMP02SK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**PRSEMP02U** = **PRSEMP02**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If PRSEMP02SK = 1 then do;

PRSEMP02 = .N;

end;

.N = (Not Applicable)

5. **PRSEMP03SK, PRCPS01U, PRSEMP03U.** The following explains how to create the flag variable -- the codebook page should contain this information:

"**PRSEMP03SK** is an indicator of whether **PRCPS01**, **PRSEMP03** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (((SRMARST = 1 OR SRMARST = 2) AND PRSEMP01 = 1) AND PRSEMP02 = 1) then **PRSEMP03SK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**PRCPS01U** = **PRCPS01**, **PRSEMP03U** = **PRSEMP03**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If PRSEMP03SK = 1 then do;

PRCPS01 = .N;

PRSEMP03 = .N;

end;

.N = (Not Applicable)

6. **PRCPS02SK, PRCPS02U. The following explains how to create the flag variable -- the codebook page should contain this information:**

"**PRCPS02SK** is an indicator of whether **PRCPS02** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (((((SRMARST = 1 OR SRMARST = 2) AND PRSEMP01 = 1) AND PRSEMP02 = 1) AND PRCPS01 = 1) then **PRCPS02SK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**PRCPS02U** = **PRCPS02**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If PRCPS02SK = 1 then do;

PRCPS02 = .N;

end;

.N = (Not Applicable)

7. **PRCPS03SK, PRCPS03U. The following explains how to create the flag variable -- the codebook page should contain this information:**

"**PRCPS03SK** is an indicator of whether **PRCPS03** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If ((((((SRMARST = 1 OR SRMARST = 2) AND PRSEMP01 = 1) AND PRSEMP02 = 1) AND PRCPS01 = 1) AND PRCPS02 = 1) then **PRCPS03SK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**PRCPS03U** = **PRCPS03**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If PRCPS03SK = 1 then do;

PRCPS03 = .N;

end;

.N = (Not Applicable)

8. **PRCPS04SK, PRCPS04U.** The following explains how to create the flag variable -- the codebook page should contain this information:

"**PRCPS04SK** is an indicator of whether **PRCPS04** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If ((((((SRMARST = 1 OR SRMARST = 2) AND PRSEMP01 = 1) AND PRSEMP02 = 1) AND PRCPS01 = 1) AND PRCPS02 = 1) AND PRCPS03 = 2) then **PRCPS04SK** = 2 (Asked)."

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

"**PRCPS04U** = **PRCPS04**, but are unedited for forward coding of non-applicable or missing response values."  
Here is how they are edited:

If PRCPS04SK = 1 then do;

PRCPS04 = .N;

end;

.N = (Not Applicable)

9. **DEPDNTSK, DEPDNTAU, DEPDNTBU, DEPDNTCU, DEPDNTDU, DEPDNTEU, DEPDNTFU, DEPDNTGU.** The following explains how to create the flag variable -- the codebook page should contain this information:

"**DEPDNTSK** is an indicator of whether **DEPDNTA, DEPDNTB, DEPDNTC, DEPDNTD, DEPDNTE, DEPDNTF, DEPDNTG** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If DEPDNTS = 2 then **DEPDNTSK** = 2 (Asked)."

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

"**DEPDNTAU = DEPDNTA, DEPDNTBU = DEPDNTB, DEPDNTCU = DEPDNTC, DEPDNTDU = DEPDNTD, DEPDNTEU = DEPDNTE, DEPDNTFU = DEPDNTF, DEPDNTGU = DEPDNTG**, but are unedited for forward coding of non-applicable or missing response values."  
Here is how they are edited:

If DEPDNTSK = 1 then do;

DEPDNTA = 0;

DEPDNTB = 0;

DEPDNTC = 0;

DEPDNTD = 0;

DEPDNTE = 0;

DEPDNTF = 0;

DEPDNTG = 0;

end;

0 = (Not Applicable)

## 10. SRRACEA—SRRACEE, SRRETH1

### **The codebook pages for SRRACEA—SRRACEE should note:**

“These items are consistent with the ‘1997 Standards for Maintaining, Collecting, and Presenting Federal Data on Race and Ethnicity’ and the 2000 Decennial Census.”

SRRACEA—SRRACEE are codes as “Mark all that apply” items, where 1=Not marked and 2=Marked. SRRACEA indicates whether the “White” response category was marked, SRRACEB indicates whether the “Black or African-American” response category was marked, SRRACEC indicates whether “American Indian or Alaskan Native” was marked, SRRACED indicates whether “Asian” was marked, SRRACEE indicates whether “Native Hawaiian or other Pacific Islander” was marked, and SRRACEF indicates whether “Some other race” was marked. If none are marked, then all of SRRACEA—SRRACEE are assigned –9 (missing).

SRRETH1 implements the October 1997 standards for reporting Federal data on race and ethnicity. The codebook page for SRRETH1 should note:

“These racial/ethnic categories are consistent with the 1997 standards for maintaining, collecting, and presenting federal data on race and ethnicity.”

SRRETH1 groups responses to SRRACEA-SRRACEF into racial/ethnic categories including multi-racial combinations. The categories are broken down by whether the respondent indicates Hispanic descent (from variable SRHISPA1). Each description in the “RACIAL CATEGORY” column of the chart is preceded by an H for “Hispanic” if the respondent has a value of 2 for SRHISPA1, and by a NH for “Non-Hispanic” if SRHISPA1 has a value of 1. The columns to the right of the descriptions show the Hispanic and race /ethnicity codes matching each description. The coding for SRRETH1 follows the coding provided in the chart. For example, Hispanic single-race respondents who mark only one of the SRRACEA-SRRACEF are assigned the corresponding code (1-5) from the racial/ethnic categories. Hispanics selecting more than one race are coded 7. Non-Hispanics reporting no race code are coded as missing (-9). The “Unassigned categories (coded as 6 and 14), are not populated in this survey, but are used when the additional response option of “Other” for race/ethnicity are included in the question. The categories for Non-Hispanics are similar, except that some racial combinations form their own categories (codes 15-18). The remaining combinations reported by Non-Hispanics are coded as 19.

CODE	RACIAL CATEGORY (SRRETH1)	SR- HISPA1	SR- RACEA	SR- RACEB	SR- RACEC	SR- RACED	SR- RACEE	SR- RACEF
1	H American Indian or Alaska Native	2	1	1	2	1	1	1
2	H Asian	2	1	1	1	2	1	1
3	H Black or African American	2	1	2	1	1	1	1
4	H Native Hawaiian or Other Pacific Islander	2	1	1	1	1	2	1
5	H White	2	2	1	1	1	1	1
6	H Some other race	2	1	1	1	1	1	2
7	Hispanic/Latino reporting more than one race	2	(Any combination of more than one 2 in SRRACEA-F)					
8	H Unknown race	2	-9	-9	-9	-9	-9	-9
9	NH American Indian or Alaska Native	1	1	1	2	1	1	1
10	NH Asian	1	1	1	1	2	1	1
11	NH Black or African American	1	1	2	1	1	1	1
12	NH Native Hawaiian or Other Pacific Islander	1	1	1	1	1	2	1
13	NH White	1	2	1	1	1	1	1
14	NH Some other race	1	1	1	1	1	1	2
15	NH American Indian or Alaska Native & White	1	2	1	2	1	1	1
16	NH Asian & White	1	2	1	1	2	1	1
17	NH Black or African American & White	1	2	2	1	1	1	1
18	NH American Indian or Alaska Native & Black or African American	1	1	2	2	1	1	1
19	NH Balance of individuals reporting more than one race	1	(Any other combination of more than one 2 in SRRACEA-F)					

**11. SRDULCDSK, SRDULCDU. The following explains how to create the flag variable -- the codebook page should contain this information:**

"**SRDULCDSK** is an indicator of whether **SRDULCD** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If **SRDULOC** = 1 then **SRDULCDSK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**SRDULCDU** = **SRDULCD**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If **SRDULCDSK** = 1 then do;

**SRDULCD** = .N;

end;

.N = (Not Applicable)

**12. SRDULSPSK, SRDULSPU. The following explains how to create the flag variable -- the codebook page should contain this information:**

"**SRDULSPSK** is an indicator of whether **SRDULSP** were or were not to be asked of a

respondent and its initial value is 1 (Not asked). If SRDULOC = 8 then **SRDULSPSK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**SRDULSPU** = **SRDULSP**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If SRDULSPSK = 1 then do;

SRDULSP = '.N';

end;

.N = (Not Applicable)

**13. SRBAHSPSK, SRBAHSPU. The following explains how to create the flag variable -- the codebook page should contain this information:**

"**SRBAHSPSK** is an indicator of whether **SRBAHSP** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If SRBAH = 9 then **SRBAHSPSK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**SRBAHSPU** = **SRBAHSP**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If SRBAHSPSK = 1 then do;

"**NPRBSOSK** is an indicator of whether **NPRBSO** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If ((MARDISC >= 1 AND MARDISC <= 4) AND ((SRMARST = 3 OR SRMARST = 4) OR SRMARST = 5)) then **NPRBSOSK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**NPRBSOU** = **NPRBSO**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If NPRBSOSK = 1 then do;

NPRBSO = .N;

end;

.N = (Not Applicable)

45. **RELTSK, RELTNAU, RELTNBU, RELTNCU, RELTNDU, RELTNEU.** The following explains how to create the flag variable -- the codebook page should contain this information:

"**RELTSK** is an indicator of whether **RELTNA, RELTNB, RELTNC, RELTND, RELTNE** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If ((SRMARST = 1 OR SRMARST = 2) OR ((MARDISC >= 1 AND MARDISC <= 4) AND (SRMARST = 3 OR SRMARST = 4 OR SRMARST = 5))) then **RELTSK** = 2 (Asked)."

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

"**RELTNAU = RELTNA, RELTNBU = RELTNB, RELTNCU = RELTNC, RELTNDU = RELTND, RELTNEU = RELTNE**, but are unedited for forward coding of non-applicable or missing response values."  
Here is how they are edited:

If RELTSK = 1 then do;

RELTNA = .N;  
RELTNB = .N;  
RELTNC = .N;  
RELTND = .N;  
RELTNE = .N;

end;

.N = (Not Applicable)

46. **HAPSPSK, HAPSPU.** The following explains how to create the flag variable -- the codebook page should contain this information:

"**HAPSPSK** is an indicator of whether **HAPSP** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (SRMARST = 1 OR SRMARST = 2) then **HAPSPSK** = 2 (Asked)."

The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:

"**HAPSPU = HAPSP**, but are unedited for forward coding of non-applicable or missing response values."  
Here is how they are edited:

If HAPSPSK = 1 then do;

HAPSP = .N;

end;

.N = (Not Applicable)

**47. HAPSOSK, HAPSO. The following explains how to create the flag variable -- the codebook page should contain this information:**

"**HAPSOSK** is an indicator of whether **HAPSO** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If ((MARDISC >= 1 AND MARDISC <= 4) AND ((SRMARST = 3 OR SRMARST = 4) OR SRMARST = 5)) then **HAPSOSK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**HAPSO** = **HAPSOSK**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If HAPSOSK = 1 then do;

HAPSO = .N;

end;

.N = (Not Applicable)

**48. SATONBASK, SATONBAU. The following explains how to create the flag variable -- the codebook page should contain this information:**

"**SATONBASK** is an indicator of whether **SATONBA** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If PSONBA = 2 then **SATONBASK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**SATONBAU** = **SATONBA**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If SATONBASK = 1 then do;

SATONBA = .N;

end;

.N = (Not Applicable)

49. **SATONBBSK, SATONBBU. The following explains how to create the flag variable -  
- the codebook page should contain this information:**

"**SATONBBSK** is an indicator of whether **SATONBB** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If **PSONBB** = 2 then **SATONBBSK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**SATONBBU** = **SATONBB**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If **SATONBBSK** = 1 then do;

**SATONBB** = .N;

end;

.N = (Not Applicable)

50. **SATONBCSK, SATONBCU. The following explains how to create the flag variable  
-- the codebook page should contain this information:**

"**SATONBCSK** is an indicator of whether **SATONBC** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If **PSONBC** = 2 then **SATONBCSK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**SATONBCU** = **SATONBC**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If **SATONBCSK** = 1 then do;

**SATONBC** = .N;

end;

.N = (Not Applicable)

51. **SATONBDSK, SATONBDU. The following explains how to create the flag variable  
-- the codebook page should contain this information:**

"**SATONBDSK** is an indicator of whether **SATONBD** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If **PSONBD** = 2 then **SATONBDSK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**SATONBDU** = **SATONBD**, but are unedited for forward coding of non-applicable or missing response values."  
Here is how they are edited:

If **SATONBDSK** = 1 then do;

**SATONBD** = .N;

end;

.N = (Not Applicable)

**52. SATONBESK, SATONBEU. The following explains how to create the flag variable - the codebook page should contain this information:**

"**SATONBESK** is an indicator of whether **SATONBE** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If **PSONBE** = 2 then **SATONBESK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**SATONBEU** = **SATONBE**, but are unedited for forward coding of non-applicable or missing response values."  
Here is how they are edited:

If **SATONBESK** = 1 then do;

**SATONBE** = .N;

end;

.N = (Not Applicable)

**53. SATONBFSK, SATONBFU. The following explains how to create the flag variable - the codebook page should contain this information:**

"**SATONBFSK** is an indicator of whether **SATONBF** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If **PSONBF** = 2 then **SATONBFSK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page**

**for the edited variable should contain this information:**

"**SATONBFU** = **SATONBF**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If SATONBFSK = 1 then do;

SATONBF = .N;

end;

.N = (Not Applicable)

**54. SATONBGSK, SATONBGU. The following explains how to create the flag variable -- the codebook page should contain this information:**

"**SATONBGSK** is an indicator of whether **SATONBG** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If PSONBG = 2 then **SATONBGSK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**SATONBGU** = **SATONBG**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If SATONBGSK = 1 then do;

SATONBG = .N;

end;

.N = (Not Applicable)

**55. SATONBHSK, SATONBHU. The following explains how to create the flag variable -- the codebook page should contain this information:**

"**SATONBHSK** is an indicator of whether **SATONBH** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If PSONBH = 2 then **SATONBHSK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**SATONBHU** = **SATONBH**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If SATONBHSK = 1 then do;

SATONBH = .N;

end;

.N = (Not Applicable)

**56. SATOFBASK, SATOFBAU. The following explains how to create the flag variable -  
- the codebook page should contain this information:**

"**SATOFBASK** is an indicator of whether **SATOFBA** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If PSOFBA = 2 then **SATOFBASK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**SATOFBAU** = **SATOFBA**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If SATOFBASK = 1 then do;

SATOFBA = .N;

end;

.N = (Not Applicable)

**57. SATOFBBSK, SATOFBBU. The following explains how to create the flag variable -  
- the codebook page should contain this information:**

"**SATOFBBSK** is an indicator of whether **SATOFBB** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If PSOFBB = 2 then **SATOFBBSK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**SATOFBBU** = **SATOFBB**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If SATOFBBSK = 1 then do;

SATOFBB = .N;

end;

.N = (Not Applicable)

**58. SATOFBCSK, SATOFBCU. The following explains how to create the flag variable -  
- the codebook page should contain this information:**

"**SATOFBCSK** is an indicator of whether **SATOFBC** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If **PSOFBC** = 2 then **SATOFBCSK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**SATOFBCU** = **SATOFBC**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If **SATOFBCSK** = 1 then do;

**SATOFBC** = .N;

end;

.N = (Not Applicable)

**59. SATOFBDSK, SATOFBDU. The following explains how to create the flag variable -  
- the codebook page should contain this information:**

"**SATOFBDSK** is an indicator of whether **SATOFBD** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If **PSOFBD** = 2 then **SATOFBDSK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**SATOFBDU** = **SATOFBD**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If **SATOFBDSK** = 1 then do;

**SATOFBD** = .N;

end;

.N = (Not Applicable)

**60. SATOFBESK, SATOFBEU. The following explains how to create the flag variable -  
- the codebook page should contain this information:**

"**SATOFBESK** is an indicator of whether **SATOFBE** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If **PSOFBE** = 2 then **SATOFBESK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**SATOFBEU** = **SATOFBE**, but are unedited for forward coding of non-applicable or missing response values."  
Here is how they are edited:

If **SATOFBESK** = 1 then do;

**SATOFBE** = .N;

end;

.N = (Not Applicable)

61. **SATOFBFSK, SATOFBFU. The following explains how to create the flag variable -- the codebook page should contain this information:**

"**SATOFBFSK** is an indicator of whether **SATOFBF** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If **PSOFBF** = 2 then **SATOFBFSK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**SATOFBFU** = **SATOFBF**, but are unedited for forward coding of non-applicable or missing response values."  
Here is how they are edited:

If **SATOFBFSK** = 1 then do;

**SATOFBF** = .N;

end;

.N = (Not Applicable)

62. **SATOFBGSK, SATOFBGU. The following explains how to create the flag variable - the codebook page should contain this information:**

"**SATOFBGSK** is an indicator of whether **SATOFBG** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If **PSOFBG** = 2 then **SATOFBGSK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page**

**for the edited variable should contain this information:**

"**SATOFBGU** = **SATOFBG**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If SATOFBGSK = 1 then do;

SATOFBG = .N;

end;

.N = (Not Applicable)

63. **SATOFBHSK, SATOFBHU. The following explains how to create the flag variable - the codebook page should contain this information:**

"**SATOFBHSK** is an indicator of whether **SATOFBH** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If PSOFBH = 2 then **SATOFBHSK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**SATOFBHU** = **SATOFBH**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If SATOFBHSK = 1 then do;

SATOFBH = .N;

end;

.N = (Not Applicable)

64. **PRGBSTFSK, PRGBSTFU. The following explains how to create the flag variable -- the codebook page should contain this information:**

"**PRGBSTFSK** is an indicator of whether **PRGBSTF** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If ((SRMARST = 1 OR SRMARST = 2) OR DEPDNTS = 2) then **PRGBSTFSK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**PRGBSTFU** = **PRGBSTF**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If PRGBSTFSK = 1 then do;

PRGBSTF = .N;

end;

.N = (Not Applicable)

65. **M1SNUSESK, M1SNUSEU. The following explains how to create the flag variable - the codebook page should contain this information:**

"**M1SNUSESK** is an indicator of whether **M1SNUSE** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If M1SUSE = 1 then **M1SNUSESK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**M1SNUSEU** = **M1SNUSE**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If M1SNUSESK = 1 then do;

M1SNUSE = .N;

end;

.N = (Not Applicable)

66. **M1STIMWSK, M1STC1U, M1STC2U, M1STIMEU, M1STIMWU. The following explains how to create the flag variable -- the codebook page should contain this information:**

"**M1STIMWSK** is an indicator of whether **M1STC1, M1STC2, M1STIME, M1STIMW** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If M1SUSE = 2 then **M1STIMWSK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**M1STC1U** = **M1STC1, M1STC2U** = **M1STC2, M1STIMEU** = **M1STIME, M1STIMWU** = **M1STIMW**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If M1STIMWSK = 1 then do;

M1STC1 = .N;

M1STC2 = .N;

M1STIME = .N;  
M1STIMW = .N;

end;

.N = (Not Applicable)

67. **RSTRSP1SK, RSTRSP1U.** The following explains how to create the flag variable -- the codebook page should contain this information:

"**RSTRSP1SK** is an indicator of whether **RSTRSP1** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If **RSTRSSQ** > 1 then **RSTRSP1SK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**RSTRSP1U** = **RSTRSP1**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If **RSTRSP1SK** = 1 then do;

**RSTRSP1** = '.N';

end;

.N = (Not Applicable)

68. **CSLSVCFSK, CSLSVCFU.** The following explains how to create the flag variable -- the codebook page should contain this information:

"**CSLSVCFSK** is an indicator of whether **CSLSVCF** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If ((**SRMARST** = 1 OR **SRMARST** = 2) OR **DEPDNTS** = 2) then **CSLSVCFSK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**CSLSVCFU** = **CSLSVCF**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If **CSLSVCFSK** = 1 then do;

**CSLSVCF** = .N;

end;

.N = (Not Applicable)

69. **AH111SK, AH111U. The following explains how to create the flag variable -- the codebook page should contain this information:**

"**AH111SK** is an indicator of whether **AH111** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If  $AH110 = 2$  then **AH111SK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**AH111U** = **AH111**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If  $AH111SK = 1$  then do;

$AH111 = .N$ ;

end;

.N = (Not Applicable)

70. **AH113SK, AH113U, AH114U, AH115U, AH116U, AH117U, AH118U. The following explains how to create the flag variable -- the codebook page should contain this information:**

"**AH113SK** is an indicator of whether **AH113, AH114, AH115, AH116, AH117, AH118** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If  $AH112 = 2$  then **AH113SK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**AH113U** = **AH113, AH114U** = **AH114, AH115U** = **AH115, AH116U** = **AH116, AH117U** = **AH117, AH118U** = **AH118**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If  $AH113SK = 1$  then do;

$AH113 = .N$ ;

$AH114 = .N$ ;

$AH115 = .N$ ;

$AH116 = .N$ ;

$AH117 = .N$ ;

$AH118 = .N$ ;

end;

.N = (Not Applicable)

If AH113 GE 999999 then AH113= 999999;

If AH113 NE .N and AH113LT 0 then AH113=.O;

.O =(Out-of-range error)

If AH114 GE 99 then AH114= 99;

If AH114 NE .N and AH114 LT 0 then AH114=.O;

.O =(Out-of-range error)

**71. AH119SK, AH119U. The following explains how to create the flag variable -- the codebook page should contain this information:**

"**AH119SK** is an indicator of whether **AH119** were or were not to be asked of a respondent and its initial value is 1 (Not asked). If (AH112 = 2 AND AH118 > 1) then **AH119SK** = 2 (Asked)."

**The following explains how the flag variable is used in editing -- the codebook page for the edited variable should contain this information:**

"**AH119U** = **AH119**, but are unedited for forward coding of non-applicable or missing response values."

Here is how they are edited:

If AH119SK = 1 then do;

AH119 = .N;

end;

.N = (Not Applicable)

**72. COMMENT. COMMENT has two codes.**

2       Text entered  
          is assigned if something is written in the space provided.

1       No text entered  
          is assigned if nothing is written in the space provided.

**COMMENTU** text from the write-in boxes and will be placed in a verbatim file.

ORGCOMA	Num	0231	0232	002	How much do you agree or disagree with each of the following statements? I enjoy serving in the military.
ORGCOMB	Num	0233	0234	002	How much do you agree or disagree with each of the following statements? Serving in the military is consistent with my personal goals.
ORGCOMC	Num	0235	0236	002	How much do you agree or disagree with each of the following statements? If I left the military, I would feel like I'm starting all over again.
ORGCOMD	Num	0237	0238	002	How much do you agree or disagree with each of the following statements? I would feel guilty if I left the military.
ORGCOME	Num	0239	0240	002	How much do you agree or disagree with each of the following statements? Generally, on a day-to-day basis, I am happy with my life in the military.
ORGCOMF	Num	0241	0242	002	How much do you agree or disagree with each of the following statements? It would be difficult for me to leave the military and give up the benefits that are available in the Service.
ORGCOMG	Num	0243	0244	002	How much do you agree or disagree with each of the following statements? I would not leave the military right now because I have a sense of obligation to the people in it.
ORGCOMH	Num	0245	0246	002	How much do you agree or disagree with each of the following statements? I really feel as if the military's values are my own.
ORGCOMI	Num	0247	0248	002	How much do you agree or disagree with each of the following statements? I would have difficulty finding a job if I left the military.
ORGCOMJ	Num	0249	0250	002	How much do you agree or disagree with each of the following statements? Generally, on a day-to-day basis, I am proud to be in the military.
ORGCOMK	Num	0251	0252	002	How much do you agree or disagree with each of the following statements? If I left the military, I would feel like I had let my country down.
ORGCOML	Num	0253	0254	002	How much do you agree or disagree with each of the following statements? I continue to serve in the military because leaving would require considerable sacrifice.
ORGCOMM	Num	0255	0256	002	How much do you agree or disagree with each of the following statements? I feel like being a member of the military can help me achieve what I want in life.
ORGCOMN	Num	0257	0258	002	How much do you agree or disagree with each of the following statements? One of the problems with leaving the military would be the lack of available alternatives.
ORGCOMO	Num	0259	0260	002	How much do you agree or disagree with each of the following statements? I am committed to making the military my career.
AH107A	Num	0261	0262	002	How much do you agree or disagree with each of the following statements? It is common for personnel to take part in identifying and eliminating worksite hazards.
AH107AA	Num	0263	0264	002	How much do you agree or disagree with each of the following statements? My supervisor seldom acts on personnel safety suggestions.
AH107AB	Num	0265	0266	002	How much do you agree or disagree with each of the following statements? Emergency response-related procedures are almost never tested to make sure they are working.
AH107AC	Num	0267	0268	002	How much do you agree or disagree with each of the following statements? The work of the command safety officer improves safety conditions in my unit.
AH107AD	Num	0269	0270	002	How much do you agree or disagree with each of the following statements? Leadership sets a positive safety example through their words and actions.
AH107AE	Num	0271	0272	002	How much do you agree or disagree with each of the following statements? My supervisor has successfully fit safety into performance of duties.
AH107AF	Num	0273	0274	002	How much do you agree or disagree with each of the following statements? The system of preventive maintenance for facilities, tools, and machinery operates poorly.

AH107AG	Num	0275	0276	002	How much do you agree or disagree with each of the following statements? Leadership regularly participates in safety programs and committee activities.
AH107AH	Num	0277	0278	002	How much do you agree or disagree with each of the following statements? The safety officer(s) has high status in this unit.
AH107AI	Num	0279	0280	002	How much do you agree or disagree with each of the following statements? Hazards that are not fixed right away by supervisors are often ignored.
AH107AJ	Num	0281	0282	002	How much do you agree or disagree with each of the following statements? Personnel take part when accident or incident investigations occur.
AH107AK	Num	0283	0284	002	How much do you agree or disagree with each of the following statements? The training provided through my supervisor helps me do my duties safely.
AH107AL	Num	0285	0286	002	How much do you agree or disagree with each of the following statements? It is well known that leadership ignores a person's safety performance when determining promotions.
AH107AM	Num	0287	0288	002	How much do you agree or disagree with each of the following statements? The safety officer is readily available to provide advice and assistance.
AH107AN	Num	0289	0290	002	How much do you agree or disagree with each of the following statements? Personnel are afraid to report safety problems to their supervisors.
AH107AO	Num	0291	0292	002	How much do you agree or disagree with each of the following statements? My supervisor always investigates safety incidents.
AH107AP	Num	0293	0294	002	How much do you agree or disagree with each of the following statements? Ventilation, lighting, noise, and other environmental conditions are kept at good levels.
AH107AQ	Num	0295	0296	002	How much do you agree or disagree with each of the following statements? A lot of personnel don't use the personal protective equipment necessary to do their jobs safely.
AH107AR	Num	0297	0298	002	How much do you agree or disagree with each of the following statements? Leadership insists that supervisors think about safety when doing their jobs.
AH107AS	Num	0299	0300	002	How much do you agree or disagree with each of the following statements? Leadership annually sets safety goals for which all personnel are held accountable.
AH107AT	Num	0301	0302	002	How much do you agree or disagree with each of the following statements? Personnel rarely take part in the development of safety requirements for their jobs.
AH107AU	Num	0303	0304	002	How much do you agree or disagree with each of the following statements? The increased stress levels and operations tempo in the work place are causing increased accidents off duty.
AH107AV	Num	0305	0306	002	How much do you agree or disagree with each of the following statements? Most off-duty vehicular accidents are due to bad decisions regarding alcohol or speed, not lack of safety training.
AH107AW	Num	0307	0308	002	How much do you agree or disagree with each of the following statements? It is not the Department of Defense's responsibility to be concerned about off-duty safety for me and my family.
AH107AX	Num	0309	0310	002	How much do you agree or disagree with each of the following statements? My supervisor is concerned for my welfare and safety off duty as well as on duty.
AH107B	Num	0311	0312	002	How much do you agree or disagree with each of the following statements? There is frequent contact and communication between personnel and leadership.
AH107C	Num	0313	0314	002	How much do you agree or disagree with each of the following statements? Safety takes a back seat to performing duties.
AH107D	Num	0315	0316	002	How much do you agree or disagree with each of the following statements? Personnel often get involved in developing or revising safety practices.

AH107E	Num	0317	0318	002	How much do you agree or disagree with each of the following statements? My supervisor maintains a high job safety standard.
AH107F	Num	0319	0320	002	How much do you agree or disagree with each of the following statements? Detailed inspections of the base and facilities are made at regular, frequent intervals.
AH107G	Num	0321	0322	002	How much do you agree or disagree with each of the following statements? Leadership's views on the importance of safety are seldom stressed in personnel communications.
AH107H	Num	0323	0324	002	How much do you agree or disagree with each of the following statements? Safety meetings are held less often than they should be.
AH107I	Num	0325	0326	002	
AH107J	Num	0327	0328	002	How much do you agree or disagree with each of the following statements? Good teamwork exists within our unit.
AH107K	Num	0329	0330	002	How much do you agree or disagree with each of the following statements? Leadership shows that it cares about personnel safety.
AH107L	Num	0331	0332	002	How much do you agree or disagree with each of the following statements? I can protect myself and other personnel through my actions while on duty.
AH107M	Num	0333	0334	002	How much do you agree or disagree with each of the following statements? My supervisor's behavior often goes against safety procedures.
AH107N	Num	0335	0336	002	How much do you agree or disagree with each of the following statements? Designated personnel are well trained in emergency-response related procedures, including evacuation.
AH107O	Num	0337	0338	002	How much do you agree or disagree with each of the following statements? Leadership has published a written policy that expresses their attitude about personnel safety.
AH107P	Num	0339	0340	002	How much do you agree or disagree with each of the following statements? Near miss accidents/incidents are thoroughly investigated.
AH107Q	Num	0341	0342	002	How much do you agree or disagree with each of the following statements? Leadership does no more than the law requires to keep personnel safe.
AH107R	Num	0343	0344	002	How much do you agree or disagree with each of the following statements? I understand the safety regulations relating to my duties.
AH107S	Num	0345	0346	002	How much do you agree or disagree with each of the following statements? My supervisor enforces safety procedures.
AH107T	Num	0347	0348	002	How much do you agree or disagree with each of the following statements? Standardized precautions are used by personnel who deal with hazardous materials.
AH107U	Num	0349	0350	002	How much do you agree or disagree with each of the following statements? Leadership has provided adequate personnel to manage and support its safety program.
AH107V	Num	0351	0352	002	How much do you agree or disagree with each of the following statements? Awards and recognition programs used in this unit are not good at promoting safe behavior.
AH107W	Num	0353	0354	002	How much do you agree or disagree with each of the following statements? Job performance standards are higher for professional duties than for safety.
AH107X	Num	0355	0356	002	How much do you agree or disagree with each of the following statements? My supervisor understands the safety problems I face.
AH107Y	Num	0357	0358	002	How much do you agree or disagree with each of the following statements? Personnel follow a regular lockout/tagout procedure.
					How much do you agree or disagree with each of the following statements? Safety training is part of every new personnel orientation.

AH107Z	Num	0359	0360	002	How much do you agree or disagree with each of the following statements? I believe leadership is sincere in its efforts to ensure personnel safety.
AH108	Num	0361	0362	002	Which of the following best describes your work location? Mark only one answer to best describe your work environment.
AH109	Num	0363	0364	002	Are you licensed to operate a motorcycle?
AH110	Num	0365	0366	002	Do you own a motorcycle?

/*-----*
This procedure runs Proc SurveyMeans. Proc SurveyMeans uses Taylor
series variance estimates and is one of a few procedures in SAS that

```

applies sample design corrections to the estimated variances. Most commonly available statistical programs have little or no capability to compensate for survey sample designs and produce inaccurate variance estimates.

In the example below Gender (XSEX) is the dependent variable and is treated as class variable. EligFlgW and XSVC are the independent variable. The results for EligFlgW show the estimated eligible and ineligible population totals for each sex. The EligFlgW\*XSVC show the estimated eligible and ineligible population totals for each sex by Service.

Note that weighted ineligible records need to be included in all domain definitions in order to properly estimate variances even though the point estimates for the ineligible records may be of no interest. SAS does provide a macro that enables Proc SurveyMeans to analyze sub-populations without printing the point estimates of unwanted domains while still include the unwanted domain information in variance estimates.

```
*-----*/

## INSTRUCTIONS FOR COMPLETING SF 298

**1. REPORT DATE.** Full publication date, including day, month, if available. Must cite at least the year and be Year 2000 compliant, e.g. 30-06-1998; xx-06-1998; xx-xx-1998.

**2. REPORT TYPE.** State the type of report, such as final, technical, interim, memorandum, master's thesis, progress, quarterly, research, special, group study, etc.

**3. DATES COVERED.** Indicate the time during which the work was performed and the report was written, e.g., Jun 1997 - Jun 1998; 1-10 Jun 1996; May - Nov 1998; Nov 1998.

**4. TITLE.** Enter title and subtitle with volume number and part number, if applicable. On classified documents, enter the title classification in parentheses.

**5a. CONTRACT NUMBER.** Enter all contract numbers as they appear in the report, e.g. F33615-86-C-5169.

**5b. GRANT NUMBER.** Enter all grant numbers as they appear in the report, e.g. AFOSR-82-1234.

**5c. PROGRAM ELEMENT NUMBER.** Enter all program element numbers as they appear in the report, e.g. 61101A.

**5d. PROJECT NUMBER.** Enter all project numbers as they appear in the report, e.g. 1F665702D1257; ILIR.

**5e. TASK NUMBER.** Enter all task numbers as they appear in the report, e.g. 05; RF0330201; T4112.

**5f. WORK UNIT NUMBER.** Enter all work unit numbers as they appear in the report, e.g. 001; AFAPL30480105.

**6. AUTHOR(S).** Enter name(s) of person(s) responsible for writing the report, performing the research, or credited with the content of the report. The form of entry is the last name, first name, middle initial, and additional qualifiers separated by commas, e.g. Smith, Richard, J, Jr.

**7. PERFORMING ORGANIZATION NAME(S) AND ADDRESS(ES).** Self-explanatory.

**8. PERFORMING ORGANIZATION REPORT NUMBER.** Enter all unique alphanumeric report numbers assigned by the performing organization, e.g. BRL-1234; AFWL-TR-85-4017-Vol-21-PT-2.

**9. SPONSORING/MONITORING AGENCY NAME(S) AND ADDRESS(ES).** Enter the name and address of the organization(s) financially responsible for and monitoring the work.

**10. SPONSOR/MONITOR'S ACRONYM(S).** Enter, if available, e.g. BRL, ARDEC, NADC.

**11. SPONSOR/MONITOR'S REPORT NUMBER(S).** Enter report number as assigned by the sponsoring/monitoring agency, if available, e.g. BRL-TR-829; -215.

**12. DISTRIBUTION/AVAILABILITY STATEMENT.** Use agency-mandated availability statements to indicate the public availability or distribution limitations of the report. If additional limitations/ restrictions or special markings are indicated, follow agency authorization procedures, e.g. RD/FRD, PROPIN, ITAR, etc. Include copyright information.

**13. SUPPLEMENTARY NOTES.** Enter information not included elsewhere such as: prepared in cooperation with; translation of; report supersedes; old edition number, etc.

**14. ABSTRACT.** A brief (approximately 200 words) factual summary of the most significant information.

**15. SUBJECT TERMS.** Key words or phrases identifying major concepts in the report.

**16. SECURITY CLASSIFICATION.** Enter security classification in accordance with security classification regulations, e.g. U, C, S, etc. If this form contains classified information, stamp classification level on the top and bottom of this page.

**17. LIMITATION OF ABSTRACT.** This block must be completed to assign a distribution limitation to the abstract. Enter UU (Unclassified Unlimited) or SAR (Same as Report). An entry in this block is necessary if the abstract is to be limited.
